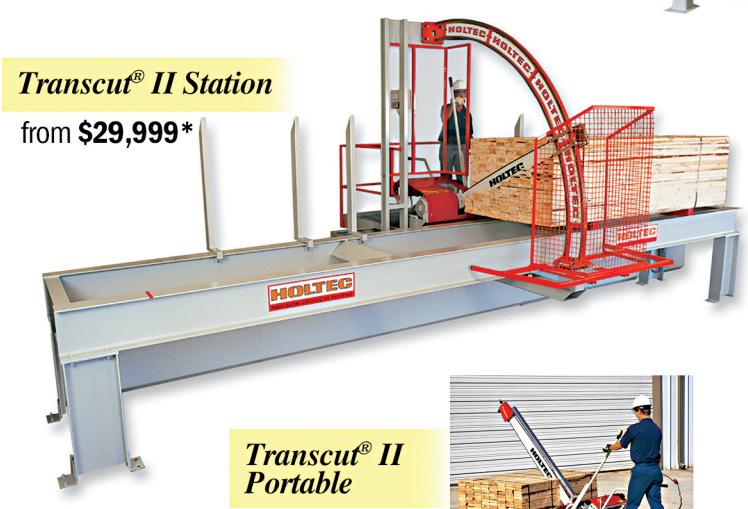
TO MAKE EVERY DOLLAR COUNT– YOU HAVE TO MAKE EVERY CUT COUNT

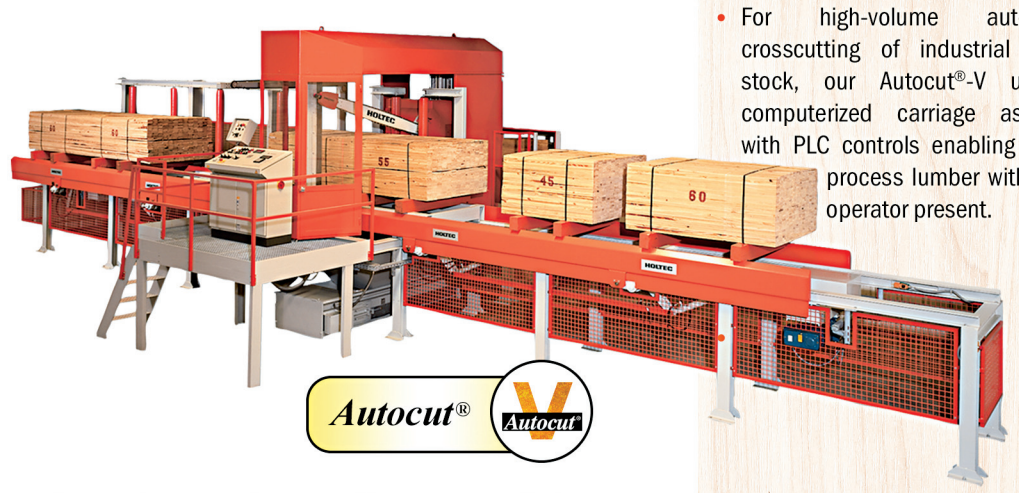
Selecut® with **Inline Squeeze**

- For prime lumber cut to length or Precision End Trimming needs, our Selecut®-V uses a Fixed Frame Assembly with a moveable cutting platform to meet your production needs in a limited space environment and is available with our Inline Power-Squeeze Package Alignment system.



Transcut® II Station
from **$29,999***

Transcut® II Portable
from **$7,999***



Autocut®

- For high-volume automated crosscutting of industrial length stock, our Autocut®-V uses a computerized carriage assembly with PLC controls enabling you to process lumber without an operator present.
- For custom manufacturers, our Transcut® II Station will cleanly cut through a unit of hardwood or softwood in less than a minute using generic chain-saw chain and with a precision of +/- 1/16th" or better*.
- For simple crosscutting of EWP or lumber, our versatile Transcut® Portable saws are priced and designed to offer a significantly safer and faster alternative to hand-held chain saws.

We're proud of the fact that HOLTEC pioneered the concept of precise package cutting over 40 years ago. Today our industry's technological and manufacturing advances have enabled us to achieve the fastest cut in the industry and an unmatched precision on every cut. So, if you're considering investing in a package-crosscut saw, consider these facts*:

- At 55 seconds per cut HOLTEC systems cut up to twice as fast as other systems available today;
- With our own team of dedicated Field Technicians and service vehicles, HOLTEC is the only company that provides you a service response time of 24 hours or less on-site and on-time;
- Our state of the art Germany manufacturing facilities are ISO-9001 certified, ensuring that you're getting the highest quality manufacturing standards available today;
- With an unmatched precision of +/- 1mm (.040"), HOLTEC systems exceed precision-end-trim tolerances;
- HOLTEC systems are designed with the highest safety standards in the world, ensuring that your employees are working in the safest environment for package-crosscutting available today;
- HOLTEC has almost 2,000 systems in North America and over 8,000 systems delivered worldwide, ensuring that we'll be here for you in the future as we have been for the last 40 years

WE ENSURE EVERY DOLLAR COUNTS BY ENSURING EVERY CUT COUNTS

SIMONDS INTERNATIONAL

PUTTING THE COMPETITIVE EDGE IN YOUR HANDS.

Every operation needs an edge. And you'll get one with Simonds **PreSharp™** blades. Backed by the industry's best service, you'll experience superior blade performance with our unique square-faced edge for faster feed rates and a smooth, clean cut.

Invest in your operation, and gain the competitive edge. Choose the blades that outperform the rest.

PRESHARP

Simonds **PreSharp™** blades have a unique, square-faced cutting edge that:

- **Delivers cleaner boards.**
- **Increases production.**
- **Puts more $$$ in your pocket.**

Conventional blades channel dust to the side of the blade, increasing dust spillage.

TRI-STATE AUCTION & REALTY, LLC. — CERTIFIED INDUSTRIAL APPRAISERS

Merry Christmas and Happy New Year from Tri-State Auction & Realty.

We at Tri-State Auction & Realty truly appreciate all of our buyers and sellers and we're so grateful for the trust you've placed in our company. We are a 3rd generation auction company specializing in the Forest Product Industry. Tri-State Auction & Realty would like to let everyone know the true meaning of Christmas.

Proverbs 16:3 – Commit thy works unto the LORD, and thy thoughts shall be established.

Meaning: When you create a business idea and plan and share it with God, He can make sure that you accomplish it. There's nothing like inviting God to be a part of your business.

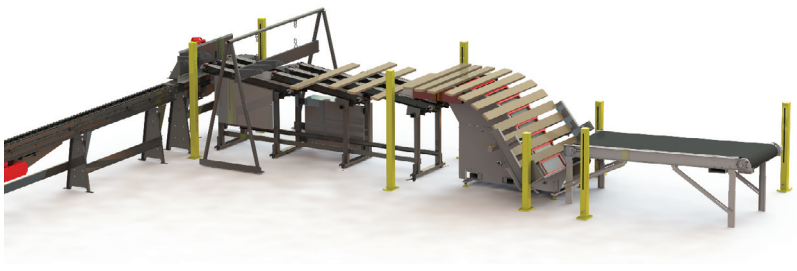
HOT ON THE MARKET!

Board Singulation and Metering System



Finally, a fully automated, labor-slashing machine for high-speed saw and notcher lines to singulate and meter cut boards. The new ABSAMS (Automated Board Singulation And Metering System) from **Automated Industrial Technologies** lets the operator feed a resaw with singulated boards at up to 400 linear feet per minute and increase throughput by reliably metering cut boards to downstream equipment. The system simultaneously runs 2x4 and 2x6 lumber, and is designed to reduce labor costs, worker fatigue and injury by eliminating hand feeding or manual transfer of material.

Pallet Recycling Systems

Wood-Mizer introduces its new Pallet Recycling Systems designed to dismantle, trim, and recycle pallets all-in-line. These new systems combine world-class built in the USA pallet recycling equipment with efficient and configurable material handling equipment.

With the ability to create configurable systems for a variety of operations, Wood-Mizer pallet recycling systems include a combination of pallet dismantlers, material handling equipment, and pallet trim saws. The Pallet Hawg® PD200 Pallet Dismantler dismantles pallets into boards and stringers for additional processing and features 60”, 66”, 72”, 84” or 96” wide options with rear or center drop table options. Belted conveyors and cross transfer decks transport material for staging or processing and include configurable options such as length, height, and incline. The PC200 Pallet Trim Saw trims boards and stringers for further processing or assembly.

In addition to complete systems, Wood-Mizer offers standalone equipment for the pallet industry including sawmills, horizontal resaws, gang saws, pallet dismantling bandsaws, power feed trim saws and material handling. Wood-Mizer Pallet Recycling Systems are now available in North America. **Contact your local Wood-Mizer representative for a layout and quote, or visit www.woodmizer.com.**
