Most so-called Christian churches do not teach what works of the devil that Christ was to destroy (1Jn 3:8-9) yet teach they can do all things through Christ (Phil 4:13). The changed times and laws (Dan 7:25) are taught to be given by Christ, not the beast. So Be It!

WELCOME

ALL RITE-AID PHARMACY CUSTOMERS!

For over 50 years, Hospital Discount Pharmacy has been serving the needs of our local community.

When you shop locally, you support neighbors and keep jobs at home. Studies show that on average, 48% of each dollar spent on a purchase at a local independent business is recirculated locally, compared to less than 14% of purchases at chain stores.

We would like to become your hometown independent pharmacy!
Please contact us for a no hassle transfer of your prescriptions.
We accept all major insurance plans.

A large portion of patients taking prescription drugs that could affect driving may not be aware they could potentially be driving impaired, according to research in the November issue of the Journal of Studies on Alcohol and Drugs. Nearly 20 percent of people in the study reported recent use of a prescription medication with the potential for impairment, but not all said they were aware that the medication could affect their driving, despite the potential for receiving warnings from their doctor, their pharmacist, or the medication label itself. The percentages of those who said they had received a warning from one of those sources varied by type of medication: 86 percent for sedatives, 85 percent for narcotics, 58 percent for stimulants, and 63 percent for antidepressants. In this study, the type of medication in question was also related to drivers' perceptions about their impairment risk. They were most likely to think that sleep aids were the most likely to affect safe driving, followed by morphine/codeine, other amphetamines, and muscle relaxants. Attention-deficit hyperactivity disorder (ADHD) medications were viewed as least likely to affect driving risk.

Women may only need three cervical screens in their lifetime if they have been given the human papillomavirus (HPV) vaccine, according to a new study published in the International Journal of Cancer. The HPV vaccine protects women against the most dangerous forms of HPV, significantly reducing the chance of developing cervical cancer.

The U.S. Preventive Services Task Force has issued a new recommendation against the use of combined estrogen and progestin in postmenopausal woman, or estrogen along in postmenopausal women who have had a hysterectomy, to prevent chronic conditions such as heart disease, dementia and stroke.

CALL IT A MOWER.

When we gave 100 landscapers our new PRO Z Series mower to test, we heard colorful reactions. With one look at the industry-leading triple-7-gauge steel deck, they knew it was different. After thousands of hours on the job, they proved the PRO Z Series could handle the demands of serious landscape professionals. From its durability in tough conditions to its unrivaled comfort, the PRO Z left professionals utterly impressed.

Saving You MONEY

SHOP TODAY'S LOW PRICE TAGS: We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS: Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
