**Who is at risk?:**

Most Women with PCS are younger than age 45 and in their childbearing years. Certain factors can put a woman at higher risk for the condition, including:

- Multiple (two or more) pregnancies
- Presence of a "tipped" (retroverted) uterus
- Polycystic ovaries

Dr. Basaraba is board certified in cardiovascular disease and is able to determine if the pelvic pain you are experiencing is indeed PCS. Using the latest diagnostic tools and minimally invasive forms of treatment, he can significantly improve your symptoms and enhance your quality of life.
