# NATIONAL FARM SAFETY WEEK

Each year since 1944, the third week of September has been recognized as National Farm Safety & Health Week. This recognition has been an annual promotion initiated by the National Safety Council and has been proclaimed as such by each sitting U.S. President since Franklin D. Roosevelt signed the first document.

**Steer clear.**

**Work safely.**

One of the most important rules of operating machinery is the 10-foot rule. It simply means to be aware of your equipment's height and reach, and keep it at least 10 feet away from power lines.

Whether you're working in the field or moving equipment from one place to another, think and look ahead to be sure power lines are not in your path. The 10-foot rule will help you steer clear of danger.
