If you can remember  
that night, then you  
can remember to

### Did you know that colorectal

cancer is the second leading cause of cancer-related deaths for men and women in the U.S. combined? And it develops with few symptoms, if any.

Starting at age 50, it's important to make a commitment to a colonoscopy screening. It can help find precancerous polyps so they can be removed before they could turn into cancer.

A colonoscopy can save your life. Schedule yours today and get back to ruling your kingdom.
