Thinking of Selling in spring or summer? Don't wait till then! Berks County has a historic low inventory of homes at this moment. Therefore, there is less inventory of homes for Buyers to choose from and Sellers will sell their property in record time!

Thinking of Buying? Did you know there is a program for first time homebuyers in the Hamburg/Northern Berks areas that provides 100% financing thru USDA. And, the Seller can contribute up to 6% of the sales price towards Buyer's closing costs. So why pay rent when you can own!!! Very little monies required from Buyer. Call our office today for more details!

Spring Cleaning Can Alleviate Allergies

Allergies affect people of all ages. The American Academy of Allergy, Asthma & Immunology reports that allergic rhinitis affects between 10 and 30 percent of the world's population. In addition, the prevalence of allergic diseases has risen in industrialized nations for more than 50 years. Seasonal allergies tend to be the strongest in spring and autumn. Allergies can be exacerbated by many factors, including in homes where improvements are being made. Regular housecleaning can remove many common allergy triggers and help alleviate symptoms. Knowing which common home improvement mistakes can aggravate allergies can help homeowners avoid them.

SUIT UP
Before any cleaning begins, allergy sufferers should don face masks and rubber gloves to prevent themselves from breathing in allergens or having them touch their hands, where they can be transferred to the face or elsewhere. Those cleaning should also wear clothes that can be easily removed and laundered after a day's work.

CLEAN WINDOWS SINGULARLY
Prolonged exposure to outdoor allergens, such as pollen, mold or ragweed, can aggravate allergies. Therefore, if windows are being cleaned, do one at a time and then promptly close the window. Having the air conditioning running can help filter the air as well.

USE EXHAUST FANS
The AAAAI recommends using an exhaust fan in the kitchen and bathrooms to reduce the levels of moisture in these rooms and filter out potential allergens and odors. Moisture can eventually lead to the growth of mold and mildew, which isn't healthy for anyone, including allergy sufferers, to breathe in.

INVEST IN A HEPA FILTER
Vacuums with HEPA filters can trap allergens that are so small that they pass through regular vacuum filters. That means instead of containing them, these small particles are only being shot back into the air where they are easily breathed in. WebMD suggests vacuuming once or twice a week to keep carpets and floors as clean as possible. Plus, don't forget to vacuum upholstered furniture and drapes as well.

LAUNDRY WITH HOT WATER
When it comes time to wash linens, do so in hot water, which can kill dust mites residing in sheets and blankets. Employ mattress covers to further protect against dust mite allergies. However- please read labels as not all fabrics can withstand anything but cold water washes!

SHAMPOO SMART
Shampooing a carpet may cause moisture to become trapped in the carpet fibers, leading to increased dust mites or mold growth. Spot-clean stains instead. Otherwise, hire a professional cleaner who will clean and dry the carpet as quickly as possible.

DAMP DUSTING IS BETTER
When cleaning up dust or home renovation debris, use a damp cloth or a vinegar solution to wipe down surfaces. This helps trap small particles instead of sending them into the air.

TREAT MOLD ISSUES
Mold can trigger allergic reactions, so it is best to keep it out of a home. Solutions that contain at least 10 percent bleach can be effective at killing mold, but it's best to prevent mold from growing entirely. That means keeping tabs of any moisture issues and addressing them immediately. Allergies can be problematic, but routine home cleaning in the right way can help alleviate symptoms.

Hypnosis... So Much More Than Clucking Like A Chicken!

By Lori Kleinsmith

Sounds funny, but, clucking like a chicken is the first thing many people associate with hypnosis. The hypnotist has volunteers from the audience doing crazy things they normally wouldn't do. They are on stage, in front of an enthusiastic group of people. The "show" is usually very funny and amazing. Just like the "show" or as it is called, Stage Hypnosis as in a Therapeutic Hypnosis sessions, people volunteered to be there. They wanted to be hypnotized and therefore were/are open to the suggestions the hypnotist gave/give them. Some things to keep in mind when considering hypnosis...

1. You cannot be hypnotized against your will. You are always in control and therefore in power.
2. A hypnotist cannot make you perform actions that are against your values or morals. When a person is hypnotized they have the ability to accept or reject any suggestions that are given by the hypnotist. They cannot surrender their will or reveal any secrets.
3. Hypnosis is a trance-like state. It is not sleep. We enter a natural state of hypnosis multiple times a day. For example: Let's say you are driving to work. You enter your car, start the engine, put it in gear and off you go to work. As you are driving, your subconscious mind starts to think about other things such as what you saw on TV that morning or remembering a conversation you had with your children or spouse. Next thing you know you are pulling into your parking spot at work. You really don't remember the whole drive but you were in control of the car. You were able to brake when needed and accelerate. You still knew what roads and turns to take. Those times you were thinking of other things as you were driving, you were in a natural hypnotic state and still in control. Hypnosis can be very relaxing if you allow it to be.
4. Hypnosis is a means of communication between the conscious mind and the subconscious mind. Many problems, habits, stress, anxieties, attitudes or apparent deficiencies can be traced to interpretations by the subconscious mind, which when understood by the conscious mind, can reduce or resolve specific problems. The subconscious is also the file cabinet of all memory.

Traumatic events can be buried or suppressed in the subconscious. A major benefit of hypnotherapy is its ability to uncover and bring into the light of understanding the buried information or experience which may be the cause of a troublesome disorder. The most common statement when a client has experienced

hypnosis: "I had no idea hypnosis was so relaxing!" For more information contact: Pinnacle Hypnosis and Therapies, 400B South Fourth St., Hamburg, PA 19526

Make Homes Safer For Pets

Pets require certain comforts to live long and healthy lives. In addition to adequate nutrition, exercise, medical care, and mental stimulation, pets need a safe place to live. The average home is filled with various items that can be harmful to pets. Just as parents baby-proof their homes when welcoming new children into their families, pet owners can take inventory of potential hazards to pets and take steps to safeguard their pets from home-related injuries. According to the American Veterinary Medical Association, a few simple adjustments around the house can prevent many pet emergencies.

- Invest in cabinet locks. Cats and dogs can be curious animals, gaining access to areas of a home pet owners never would have imagined possible. If you can't store everything beyond pets' reach, then use cabinet and drawer latches to prevent access to areas that are off limits. Lock doors to basements, garages and storage sheds as well.
- Cover all garbage cans. Animals have extraordinary senses of smell, and they may be attracted to trash cans around the house. Pets rooting around in the garbage can be messy, but this can also make pets vulnerable to illness. Invest in garbage cans with

- locks or tight lids to prevent food poisoning or choking.
- Use medications wisely. Be mindful of medications, making sure none of your pills fall on the floor where they can be gobbled up by pets.
- Protect belongings. Cats can scale many objects in the house, gaining access to areas of the house that dogs cannot reach. Cats also can be attracted to small shiny objects, such as jewelry or glass items, that are choking hazards. Store potential choking hazards out of sight of curious cats.
- Clean the furnace. Allergens and poor indoor air quality is not just a concern for humans. Pets also can be affected by allergies and health issues that result from exposure to mold or dirt in a home. Have your HVAC system routinely serviced and routinely change indoor air filters to maintain healthy air quality. When possible, open windows to let fresh air inside.
- Secure windows and doors. Cats and dogs may be distracted by something outdoors and feel compelled to chase after it. Dogs and cats can suffer serious injuries if they fall from windows. Make sure window screens are secure and install guards if your pet likes to hang out by the windows. Exercise caution when entering and leaving your home so pets don't scurry outside.

- Keep cords and electronic outlets secure. Teething puppies or curious cats may bite or pull on power cords. Use cord keepers to cover up electric lines and outlet locks to keep plugs where they should be.
- Provide a comfortable indoor climate. Many pets spend the majority of their days indoors where climate and temperature can be controlled. However, if yours is an outside pet or requires a brief stint in the garage or an uninsulated area, make sure the temperature in such areas is comfortable and safe.

Take precautions around the house to keep pets safe, comfortable and secure.

I Don't Need To Advertise

You're Right... There is a time NOT to advertise, when...

- You have no competition.
- You have all the business in town.
- There are no new people moving into your area.
- You want to keep your large inventory.
- You have more business than you can handle.
- The birth rate is zero.
- You have more than enough friends that shop your business, keeping you far too busy.
- You've netted your third million (after taxes).
- You have no desire to work hard.
- You would have to hire more people to handle the additional business advertising brings.

The time to start advertising is...
When you don't agree with all the above.

The place to start advertising is...
The one that has a combined circulation of 71,500 homes.
