Patients who suffer from Aspirin Exacerbated Respiratory Disease (AERD) often experience an additional allergic reaction when drinking alcohol, including nasal congestion, wheezing, and a runny nose. Now a new study published in the journal International Forum of Allergy and Rhinology finds a common treatment for AERD-aspirin desensitization-can also help alleviate the alcohol-induced symptoms of the condition

Taking a low-dose aspirin daily may help women lower their risk of developing ovarian cancer. A new study published in JAMA Oncology found that women who reported taking a low-dose aspirin every day had a 23 percent lower risk of ovarian cancer compared to nonaspirin users. The research also found that women who were heavy users of nonaspirin nonsteroidal anti-inflammatory drugs (NSAIDs), such as ibuprofen (Advil) or naproxen (Aleve), over a long period of time had a higher risk of developing ovarian cancer. Ovarian cancer is the most fatal gynecological cancer, largely due to lack of early detection strategies.

Two recent studies published in the journals Frontiers in Pharmacology and Medicines, document that patients experienced statistically and clinically significant therapeutic benefits when they used cannabis for dozens of health symptoms, ranging from chronic pain to insomnia, with relatively minimal negative side effects.

### SHOP TODAY'S LOW PRICE TAGS:

We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

### NO LIMITS:

Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
