Holy Spirit, You who know everything And shows me the way to reach my Ideals, You who give me the divine gift to forgive and forget And You who are in all the instincts of my life with me. I in this short dialogue want to thank you for everything and confirm once more that I never want to be separated from You in spite of material illusions. I want to be with You and my loved ones in Your Perpetual Glory. Thank you for Your love toward me and my loved ones, Say for 3 days and Your prayers will be answered, promise to publish once favor has been granted. CBM. Pray to the Blessed Virgin. Never Know to Fail. O, most beautiful flower of Mt. Carmel, Fruitful Vine, Splendor of Heaven, Blessed Mother of the Son of God, Immaculate Virgin, assist me in my necessity. O Star of the Sea help me and show me, that you are my Mother. O Holy Mother of God, Queen of Heaven and Earth, I humbly beseech you from the bottom of my heart to succor me in my necessity. (Make request). There are none that can withstand your power. O Mary conceived without sin, pray for us who have recourse to thee (3x), Holy Mary I place this cause in your hands (3x). Say This prayer for 3 consecutive days then publish it. Your request will be granted. CBM. May the sacred Heart of Jesus be adored, glorified and loved and preserved throughout the world now and forever. Sacred Heart of Jesus have mercy on us. Saint Jude, worker of miracles pray for us. Saint Jude, help for the hopeless, pray for us.

READER'S **Recipe**

BLUEBERRY ZUCCHINI BREAD

- | | |
|-----------------------------|------------------------------|
| 3 eggs, lightly beaten | 1 teaspoon salt |
| 1 cup vegetable oil | 1 teaspoon baking powder |
| 3 teaspoons vanilla extract | 1/4 teaspoon baking soda |
| 2-1/4 cup white sugar | 1 tablespoon ground cinnamon |
| 2 cups shredded zucchini | 1 pint fresh blueberries |
| 3 cups all-purpose flour | |

Preheat oven to 350 degrees F. Lightly grease 4 mini-loaf pans. In a large bowl, beat together the eggs, oil, vanilla and sugar. Fold in the zucchini. Beat in the flour, salt, baking powder, baking soda, and cinnamon. Gently fold in the blueberries. Transfer to the prepared mini-loaf pans.

Bake 50 minutes in the preheated oven, or until a knife inserted in the center of a loaf comes out clean. Cool 20 minutes in pans, then turn out onto wire racks to cool completely.

HELP WANTED
Veterinary Hospital in Kutztown is seeking a customer service team member for a part time position. This position includes answering phone calls (including scheduling appointments, answering basic questions, giving directions, taking accurate and detailed messages), greeting clients when they arrive, invoicing clients at the completion of the visit, computer skills (recording weights, entering data into the patient record), completing forms, light housekeeping such as cleaning up spills or sweeping up pet hair, returning or making phone calls (confirming appointments, relaying negative or normal test results, prescription pick ups). One year of clerical experience is preferred, alternatively one year of experience in a veterinary or medical office. Please send resume to: Kutztownah@gmail.com or mailed to Kutztown Animal Hospital 15620 Kutztown Rd, Kutztown PA 19530, or dropped off in person in a sealed envelope.

For The Year 2018 Drinking Water Quality Report

Public Water Supply Identification (PWSID) Number is 3060041

The Borough of Kutztown & The Kutztown Municipal Authority

We're pleased to present to you this year's 2018 Annual Drinking Water Quality Report.

ESTE INFORME CONTIENE INFORMACION MUY IMPORTANTE SOBRE LA CALIDAD DE SU AGUA BEBER.
 TRADUSCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BIEN.

Is my water safe?

We are pleased to present this year's **Annual Water Quality Report** (Consumer Confidence Report) as required by the Safe Drinking Water Act (SDWA). This report is designed to provide details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. This report is a snapshot of last year's water quality. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Water Quality Data Table

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of contaminants in water provided by public water systems. The table lists all of the drinking water contaminants that we detected during the calendar year of this report. Although many more contaminants were tested, only those substances listed were found in your water. All sources of drinking water contain some naturally occurring contaminants. At low levels, these substances are generally not harmful in our drinking water. Removing all contaminants would be extremely expensive, and in most cases, would not provide increased protection of public health. A few naturally occurring minerals may actually improve the taste of drinking water and have nutritional value at low levels. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not vary significantly from year to year, or the system is not considered vulnerable to this type of contamination. As such, some of our data, though representative, may be more than one year old. In this table you will find terms and abbreviations that might not be familiar to you. To help you better understand these terms, we have provided the definitions below the table.

Where does my water come from?

Our water source consists of four ground water wells known as Wells 1, 2, 3A and 4 located on what is known as the Borough Farm.

Source Water Assessment and Its Availability

The Northeast Berks County Wellhead Protection Plan was completed in 2008. The plan has found that our well sources are potentially most susceptible to agricultural activities and transportation corridors. Overall, our sources have a high risk of significant contamination. Complete reports were distributed to municipalities, water suppliers, local planning agencies and PADEP offices. Copies of the complete report are available for review at the PADEP Southcentral Regional Office at (717) 705-4700.

IMPURITIES DETECTED BY THE BOROUGH OF KUTZTOWN AND THE KUTZTOWN MUNICIPAL AUTHORITY

Contaminants	MCLG or MRDLG	MCL, TT, or MRDL	Detect in Your Water	Range Low High	Sample Date	Violation	Typical Source
DISINFECTANTS & DISINFECTION BY-PRODUCTS (There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants)							
Chlorine (as Cl ₂) (ppm)	4	4	1.42	.71 1.42	2018	No	Water additive used to control microbes
Haloacetic Acids (HAA5) (ppb)	NA	60	5.65	NA 5.65	2018	No	By-product of drinking water chlorination
TTHMs [Total Trihalomethanes] (ppb)	NA	80	15.9	2.23 15.9	2018	No	By-product of drinking water disinfection
Total Organic Carbon (% Removal)	NA	TT	NA	NA NA	2018	No	Naturally present in the environment
INORGANIC CONTAMINANTS							
Barium (ppm)	2	2	.032	0 .032	2018	No	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Chromium (ppb)	100	100	1	0 1	2018	No	Discharge from steel and pulp mills; Erosion of natural deposits
Nitrate [measured as Nitrogen] (ppm)	10	10	5.04	4.41 5.04	2018	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
MICROBIOLOGICAL CONTAMINANTS							
Turbidity (NTU)	NA	0.3	100	NA NA	2018	No	Soil runoff
100% of the samples were below the TT value of .3. A value less than 95% constitutes a TT violation. The highest single measurement was .3. Any measurement in excess of 1 is a violation unless otherwise approved by the state							
Contaminants	MCLG	AL	Your Water	Sample Date	# Samples Exceeding AL	Exceeds AL	Typical Source
INORGANIC CONTAMINANTS							
Copper - action level at consumer taps (ppm)	1.3	1.3	.26	2016	0	No	Corrosion of household plumbing systems; Erosion of natural deposits
Lead - action level at consumer taps (ppb)	0	15	11	2016	2	No	Corrosion of household plumbing systems; Erosion of natural deposits

Unit Descriptions

ppm: Parts per million or milligrams per liter (mg/L)

ppb: Parts per billion or micrograms per liter (µg/L)

NTU: Nephelometric Turbidity Units – Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of the effectiveness of our filtration system.

Important Drinking Water Definitions

MCLG: Maximum Contaminant Level Goal – The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MCL: Maximum Contaminant Level – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

TT: Treatment Technique – A required process intended to reduce the level of a contaminant in drinking water.

AL: Action Level – The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's (EPA) Safe Drinking Water Hotline (800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity: microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems; and radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

How can I get involved?

We, at the Borough of Kutztown and the Kutztown Municipal Authority, work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

If you have any questions about this report or concerning your water utility, please contact Troy Smith, Water Plant Manager, at 610-683-5962. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled Water/Wastewater committee meetings. They are held on the second Wednesday of the month, at 7:30 PM at 45 Railroad Street, Kutztown.

Borough of Kutztown

45 Railroad Street
 Kutztown, PA 19530
 Phone: (610) 683-6131
 Fax: (610) 683-6729
 Email: admin@kutztownboro.org

Description of Water Treatment Process

Your water is treated by filtration and disinfection. Filtration removes particles suspended in the source water. Particles typically include clays and silts, natural organic matter, iron and manganese, and microorganisms. Your water is also treated by disinfection. Disinfection involves the addition of chlorine or other disinfectants to kill bacteria and other microorganisms (viruses, cysts, etc.) that may be in the water. Disinfection is considered to be one of the major public health advances of the 20th century.

Monitoring and Reporting of Compliance Data Violations

There were no monitoring or reporting violations for 2018.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Borough of Kutztown and the Kutztown Municipal Authority is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.
