Honey and over-the counter remedies should be a patient's first point of call to treat a cough, not antibiotics, says England's The National Institute for Health and Care excellence (NICE) in a new draft guidance. In most cases, acute coughs are caused by a cold or flu virus, or bronchitis, and last around three weeks. Honey and cough medicines containing pelargonium, guaifenesin or dextromethorphan have some evidence of benefit for the relief of cough symptoms.

High doses of vitamin D taken one hour after sunburn significantly reduce skin redness, swelling, and inflammation, according to a double-blinded, placebo-controlled clinical trial. The trial results were recently published in the Journal of Investigative Dermatology.

\*\*\*

Up to half of people with Alzheimer's disease (AD) use a psychotropic drug, and one in five uses two or more psychotropics concomitantly, according to a new study. Psychotropic drug use was more common among persons with Alzheimer's disease already five years before the diagnosis, and the difference to comparison persons without AD increased at the time of diagnosis. Four years after the diagnosis, psychotropic drug use was three times more common in persons with AD than in comparison persons. Of psychotropic drugs, the use of antipsychotics was almost eight times more common among persons with Alzheimer's disease than among comparison persons. The use of at least two psychotropics concomitantly was three times more common among persons with Alzheimer's disease.

# Saving You MONEY

**SHOP TODAY'S LOW PRICE TAGS:**  
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

**NO LIMITS:**  
Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.

**MITCHELL**
