DO YOU HAVE TYPE 2 DIABETES?

SEMAGLUTIDE CARDIOVASCULAR OUTCOMES TRIAL (SOUL)

Have you considered participating in a clinical study which might have a positive effect on heart disease?

Research has shown that treatment with injectable semaglutide can reduce the risk of stroke and heart attack in people with type 2 diabetes. One study has indicated that a similar effect may be obtained with semaglutide tablets. The SOUL study has been designed to confirm and better understand these findings by comparing semaglutide tablets against placebo ("dummy" medication) for a period of 3-5 years.

You may qualify to participate in the study if:

- You have type 2 diabetes
- You are 50 years of age or older
- Have heart disease or kidney disease
- You are able and willing to adhere to study procedures

What are the benefits of being involved in the SOUL study?

- Study-related care, including regular health checks and medical testing
- Access to blood glucose testing equipment

This study is currently recruiting.
