What Can Stem Cells Do For You?

Are you considering knee, hip, shoulder, ankle, or wrist surgery or just having severe pain?

Stem cell therapy - I had tennis elbow and had cortisone injections to help the pain - wrong - it burned half the elbow tissue and I went to the orthopedic surgeons and was told that it was inoperable and was prescribed an anti inflammatory - I thought all hope was lost until I met Doc Kanan - been over a month since I had the stem cell injection and Cold K laser therapy and my elbow is like new no pain and I can actually lift things with my arm now - so happy would do it again if something else breaks down! The best!

DO YOU HAVE TYPE 2 DIABETES?

SEMAGLUTIDE CARDIOVASCULAR OUTCOMES TRIAL (SOUL)

Have you considered participating in a clinical study which might have a positive effect on heart disease?

Research has shown that treatment with injectable semaglutide can reduce the risk of stroke and heart attack in people with type 2 diabetes. One study has indicated that a similar effect may be obtained with semaglutide tablets. The SOUL study has been designed to confirm and better understand these findings by comparing semaglutide tablets against placebo ("dummy" medication) for a period of 3-5 years.

You may qualify to participate in the study if:

- You have type 2 diabetes
- You are 50 years of age or older
- Have heart disease or kidney disease
- You are able and willing to adhere to study procedures

What are the benefits of being involved in the SOUL study?

- Study-related care, including regular health checks and medical testing
- Access to blood glucose testing equipment

This study is currently recruiting.
