Due to sever lower back pain, I haven't even been able to even do the dishes without taking a break to sit down. I didn't realize I had two bulging discs that were pressing against a nerve until I came to Tullahoma

Chiropractic. The decompression therapy is wonderful. For the past 2 years, I haven't been able to walk for thirty minutes without being in pain and having to take a break. This week, I went shopping for 3 hours pain free! Decompression therapy has changed my life!

Who is a Candidate?

Our spinal decompression system has been found to relieve the pain associated with disc degeneration, herniated and bulging discs, facet syndrome, and sciatica. Spinal decompression is a great option because back surgery is so risky.

The Solution:

Our method is a proven, comprehensive treatment program which includes computerized true disc decompression, cold laser therapy, and exercise rehabilitation to promote long term spinal health. Spinal decompression is considered by many doctors to be the most advanced and successful noninvasive treatment of serious back, neck, leg or arm pain. The method allows for a much higher success rate by increasing hydration and restoring health to your discs. This results in a more effective and lasting solution to your pain. There are no side effects and no recovery time is required. This gentle and relaxing treatment has proven to be effective even when drugs, epidurals, traditional chiropractic, physical therapy and surgery have failed.

Sciatica and herniated discs are often misunderstood.

They can cause pain and numbness in the back, neck, legs and feet. This pain affects everything you do, from work to play, and ultimately your quality of life. We are here to tell you that there is hope. We have the technology and experience to help you find relief from sciatica and back pain. We have helped thousands of pain sufferers just like you. We offer only the most advanced non-surgical treatments.

**Before you consider surgery
consider these points:**

- Back surgery can cost \$50,000 to \$100,000 or more
- Recovery can be very painful and can take months or years
- Surgery may or may not relieve your pain
- Dependence on prescription drugs may occur after surgery
- Missed work can amount to \$1,000's in lost wages
- Outcomes may be uncertain, and surgery is not reversible
