## Salome's Stars

**ARIES** (March 21 to April 19) Despite your Aries penchant for wanting to tackle a problem head-on, you might want to take a little more time to see how a current situation develops. It could surprise you.

**TAURUS** (April 20 to May 20) Taking on the role of peacemaker in a disruptive environment is a challenge. But you can do it. Just continue to have the same faith in yourself that so many others have in you.

**GEMINI** (May 21 to June 20) Although your work schedule keeps you busy, you should make time to start preparing for that important upcoming family event you'll want to celebrate in a special way.

**CANCER** (June 21 to July 22) Home is where the Moon Child wants to be early in the week. But by week's end, a chance to travel raises her or his excitement level, and that of the lucky person who gets to go along.

**LEO** (July 23 to August 22) Be careful not to be a copycat when dealing with someone who uses unfair or even unkind methods to reach a goal. As always, do the right thing the right way, and you'll win in the end.

**VIRGO** (August 23 to September 22) An offer could have many good things attached to it that are not apparent at first glance, including a chance to move into another career area. You might want to check out its possibilities.

**LIBRA** (September 23 to October 22) With responsibilities surging both in the workplace and in the home, it's important to prioritize how you deal with them. Be patient. Pressures will begin to ease starting early next week.

**SCORPIO** (October 23 to November 21) A positive reaction to a suggestion could indicate that you're on track for getting your message to the right people. Devote the weekend to catching up with the special people in your life.

**SAGITTARIUS** (November 22 to December 21) A new attitude from those in charge could make things difficult for you unless you can accept the changes without feeling as if you're being pressured into doing so.

**CAPRICORN** (December 22 to January 19) Family matters once again dominate much of the week. But don't neglect your workplace duties while you deal with them. An offer to help could come from a surprising source.

**AQUARIUS** (January 20 to February 18) A difficult workplace situation begins to ease, but there still are matters that need to be dealt with before it's fully resolved. There's also a more positive turn in domestic relationships.

**PISCES** (February 19 to March 20) Don't let yourself be rushed into making a decision about an intriguing financial arrangement. Asking questions and checking it out now could pay off in a big way later on.

**BORN THIS WEEK:** You might have a tendency to be more than a bit judgmental, but others understand it comes from a warm, loving heart.

Tried And Trusted

A wealthy investor walked into a bank and said to the bank manager, "I would like to speak with Mr. Reginald Jones, who I understand is a tried and trusted employee of yours."

The banker said, "Yes, he certainly was trusted. And he will be tried as soon as we catch him."

My Wife texted me a selfie in a new dress and asked "Does this make my butt look big?"

I texted back "Noo!"

My phone autocorrected my response to "Moo!"

Summer continues to be an intense one for shelters that accept cats. Within the past few days, we have received many kittens and cats that have come from other localities, have been found in the middle of highways, have been caught in traps, or have been abandoned. We receive many complaints from people who do not want outside cats to walk on their cars, stalk birds at their feeders, use their yards for litter boxes, or cause other damage or disruption.

Many years ago, our cat adoption policy was changed to require cats adopted from us to be kept strictly inside. We received criticism about it, but we are absolutely convinced it is the correct policy.

It is vital to keep cats inside. Outside cats face many dangers, and their life expectancy is 1-5 years. A cat kept strictly inside has an average life expectancy of 12-20 years.

Contact with other cats outside leads to the risk of disease transmission. Feline leukemia and feline immunodeficiency are transmitted from cat to cat and, once contracted, result in the eventual death of the animal.

Dogs and other wild animals pose a threat to cats; the very real danger is one of exposure to rabies. Outdoor cats can suffer torn ears, cut eyes, abscesses, and other injuries requiring veterinary treatment.

Indoor cats are not generally exposed to fleas, ticks, ear mites, or other parasites that can cause anemia, skin irritations, allergic reactions, and even death.

Outdoor cats are at risk to be poisoned. Neighbors may deliberately poison cats

they view as nuisances, but accidental poisonings also occur. Chemically treated lawns, bait left out to kill rats or mice, and antifreeze can all be deadly dangers.

It is a myth that cats are "streetwise." Cats are intelligent and alert, but they stand very little chance against traffic. We can tell horror stories, and even have the pictures, of outside cats that have been beheaded, scalped, electrocuted, burned, tortured, or starved. A dogfighting investigation seminar I attended a couple of years ago showed actual video of cats and kittens being used to train dogs to kill. I will never forget the kittens and cats we have received that have been exposed to freezing temperatures and harsh hurricane weather.

In short, outside cats are at the mercy of the people they encounter, as well as weather conditions and other animals.

The list of hazards for outside cats goes on and on. We encourage everyone to keep their cats inside. It truly is the best life for a cat.
