PHARMACY TOPICS

by **Rex Smith**
Hospital Discount CENTRAL

Pictured L-R: Vanessa Patton, Becky Cook, Becky Burks and Rex Smith, RPh

Research with postmenopausal women found a 57.8 percent rate of metabolic syndrome among women presenting vitamin D insufficiency or deficiency. The results of the study were published in the journal Maturitas. A previous study analyzed the association between vitamin D deficiency and breast cancer in postmenopausal women. Levels of vitamin D were sufficient in 33.9% of the patients and insufficient or deficient in 66.1%. A higher proportion of those with vitamin D insufficiency or deficiency had high-grade tumors or metastatic disease.

Could omega-6 fatty acids protect you against premature death? The answer is yes, according to a recent study published in the American Journal of Clinical Nutrition. While protecting against death, omega-6 fatty acids also keep cardiovascular diseases at bay.

Opioids are not among the most effective-or longest lasting-options available for relief from acute dental pain, a recent examination of the results from more than 460 published studies has found. Ibuprofen and other nonsteroidal anti-inflammatory drugs (NSAIDs) alone or in combination with acetaminophen are better at easing dental pain, according to the new research. The study examining relief of acute pain in dentistry-recently featured on the cover of The Journal of the American Dental Association- evaluated the safety and efficacy of dozens of pain-relief options. Each day, more than 115 Americans die as a result of an opioid overdose, according to the National Institutes of Health. The research found that, for adults, a combination of 400 milligrams of ibuprofen and 1,000 milligrams of acetaminophen was superior to any opioid- containing medications studies. The study also found that opioids or drug combinations that included opioids accounted for the most adverse side effects-including drowsiness, respiratory depression, nausea/vomiting and constipation in both children and adults.

PREVENT T2

A PROVEN PROGRAM TO PREVENT OR DELAY TYPE 2 DIABETES

Offered by Cullman Primary Care, P.C. and Cullman Wellness and Aquatics Center

The Prevent T2 Lifestyle Change Program is part of the National Diabetes Prevention Program, led by the Centers for Disease Control and Prevention (CDC). This proven program can help you make modest lifestyle changes and cut your risk of type 2 diabetes by more than HALF.

To find out if you are at risk for prediabetes, talk with your doctor, or go to <https://www.cdc.gov/diabetes/risktest/>

SHOP TODAY'S LOW PRICE TAGS:

We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS:

Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.

MITCHELL
GROCERY CORP.

IS WHAT WE ARE ALL ABOUT

SHOP TODAY'S LOW PRICE TAGS:
We have HUNDREDS of non-advertised items marked down throughout our entire store. More savings passed on to our customers. Just look for blue tags on the shelves.

NO LIMITS:
Our competitors also have advertised specials. The difference is, in most cases, they have a limit on how many of an item you can buy at the sale price...we don't have any limits to family shoppers.
