Those with chronic back and neck pain can now breathe a sigh of relief thanks to Dr. Joseph Kanan and state-of-the-art non-surgical technology.

Over 20 years ago, N.A.S.A. began investigating the effects of space travel on the spine. In the "micro-gravity" state, astronauts gain as much as three inches due to increased disc height. This advanced technology is now being used to help those who suffer with chronic back and neck pain.

The innovative spinal technology was developed by a team of back specialists and engineers. During treatment, the spine elongates which increases disc height and allows more fluid into the disc. The treatments are used to treat **herniated, bulging, and protruding discs, sciatica, facet syndrome and degenerative disc disease.**

This technology has helped thousands of patients with chronic pain. Many of these patients had lost hope and some had prior surgery.

Treatment is extremely comfortable and many patients fall asleep during their treatment. In some cases, the pain resolves after the first few minutes of being on the machine

Due to sever lower back pain, I haven't even been able to even do the dishes without taking a break to sit down. I didn't realize I had two bulging discs that were pressing against a nerve until I came to Tullahoma Chiropractic. The decompression therapy is wonderful. For the past 2 years, I haven't been able to walk for thirty minutes without being in pain and having to take a break. This week, I went shopping for 3 hours pain free! Decompression therapy has changed my life!
