IS YOUR CAR READY FOR WINTER?

WINTER CAR CARE & DRIVING TIPS

- Keep your equipment properly maintained and include a winter survival kit in your vehicle: an ice scraper, snow shovel and sand/salt.
- Clear snow and ice off your car - including windows, mirrors, lights, reflectors, hood, roof and trunk.
- Drive with your headlights on, and be sure to keep them clean to improve visibility.
- Avoid using cruise control in snowy or icy conditions.
- Know how to brake on slippery surfaces. Vehicles with anti-lock brakes operate much differently from those that do not have anti-lock brakes.
- If you do venture out or are unexpectedly caught in a snowstorm and encounter problems, stay in your car and wait for help. You can run the car heater to stay warm for 10 minutes every hour, but make sure your exhaust pipe is clear of snow. There is a danger of carbon monoxide poisoning if snow blocks the pipe and enables the deadly gas to build up in your car. Open your window slightly to help prevent the buildup.
- Be cautious on bridges and overpasses as they are commonly the first areas to become icy.
- Avoid passing snow plows and sand trucks.
