#### When thunder roars, go indoors

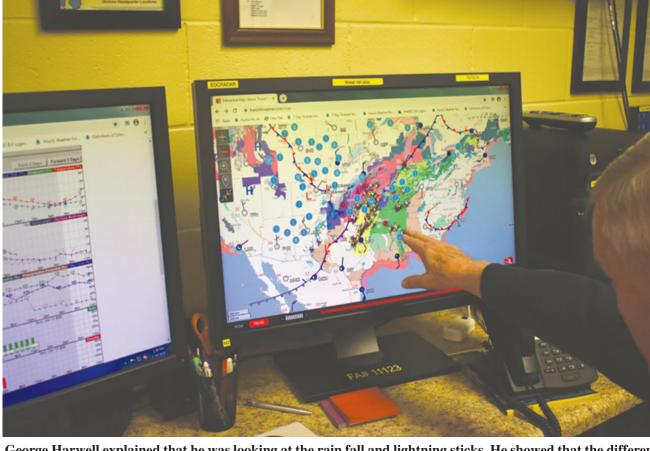

After asking George Harwell, operations specialist of Marshall County EMA, to explain the dangers of lightning he simply stated, "When thunder roars, go indoors."

There have been lightning deaths in Marshall County before, most notably of a swimmer a few years ago at Honeycomb. Harwell went on to ex-

plain that lightning is not something that should be taken lightly. If you hear thunder, you should go indoors and stay there until you have not heard any rumbles for at least 30 minutes.

If you hear thunder, find a safe shelter immediately. You should move ble. You should not seek shelter under a tree. Harwell said a tree conducts

Lightning is the leaded hazards.

## Weather and Storm Outage **Tips**

- 1. Make sure you know where your flashlights are, and have them easily accessible.
- 2. You'll want to have extra batteries for your flashlights, just in case.
- 3. If you plan on using candles, have extra matches and lighters.
- 4. Plug your appliances into surge protectors.
- 5. Before the storm hits, completely charge all your devices, but unplug them during the storm.
- 6. If it's cold outside, have plenty of blankets and warm clothes available for layering.
- 7. Sign up for our text alerts for outage information.

During business hours, call the office for outages.

For nights, holidays and weekends, call our answering service at 256-582-3441

# MARSHALL COUNTY

Marshall County Gas District knows the importance of everyone being aware and knowing what to do in case of a natural gas emergency and especially during severe weather. MCGD wants to prepare customers and non-customers with the following natural gas safety tips:

#### **Detecting Gas Leaks**

If you smell a rotten egg odor that is often associated with natural gas, you should immediately leave the affected area; and call our 24-hour emergency line at 1-800-552-1382. If the natural gas odor is present do not use a telephone or cellular phone, turn light switches on or off, or operate any appliance, garage door opener or do anything that might cause a spark, such as lighting a match.

#### **Damage Prevention and Natural Gas Safety**

Strong winds and saturated grounds could cause trees to become uprooted. Before removing downed trees, you should call Alabama 811 by dialing 811 to have the location of utility lines marked. If a MCGD natural gas meter is damaged or gas line is exposed and leaking, immediately leave the area; and call our emergency line.

As your natural gas provider, MCGD is committed to maintaining the highest safety standard possible. Please take all severe weather warnings seriously and plan ahead.

Marshall County Gas District • Albertville, Arab & Guntersville

Office Hours: Monday-Friday 7:30am-4:30pm • Emergency Line: 1-800-552-1382

Toll Free 1.800.552.1382
