## 2019 Water Quality Report for the City of Alma

This report covers the drinking water quality for the City of Alma water system for the 2019 calendar year. This information is a snapshot of the quality of the water that we provided to you in 2019. Included are details about where your water comes from, what it contains, and how it compares to Environmental Protection Agency (EPA) and state standards.

Your water comes from six groundwater wells, depths ranging from 105 feet to 162.5 feet, and the Pine River as necessary. The Gratiot Area Water Authority (GAWA) treats and softens the well water prior to pumping into the city's water distribution system. The State completed an assessment of our source water to determine the susceptibility or the relative potential of contamination in 2003. The susceptibility rating is a seven-tiered scale ranging from "very-low" to "very-high" based on geologic sensitivity, well construction, water chemistry and contamination sources. Well #7 was ranked moderately low. Well #1 was ranked as having a high degree of sensitivity to potential contamination. New wells #8, #9, #10, and #11 were installed after the assessment was completed and are currently not ranked.

There are no significant sources of contamination to the city's well fields. The City has adopted and implemented a well head protection plan to further protect the well fields from potential contaminants

The Pine River is susceptible to contamination by illegal dumping and runoff and has a susceptibility rating of very high. The Pine River currently serves only as a back-up source in case of emergency. No water was taken from the Pine River for treatment in 2019

This information is outlined in the Source Water Assessment Report and is available to the public upon request.

**Contaminants and their presence in water:** Drinking Water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

**Vulnerability of sub-populations:** Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune systems disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

**Sources of drinking water:** The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. Our water comes from a blended well/river source and is treated and softened at the GAWA water treatment plant. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- \* **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.
- \* **Inorganic contaminants**, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- \* **Pesticides and herbicides**, which may come from a variety of sources such as agriculture and residential uses.
- \* **Radioactive contaminants**, which can be naturally occurring or be the result of oil and gas production and mining activities.
- \* **Organic chemical contaminants**, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which provide the same protection for public health.

### Water Quality Data

The table below lists all of the drinking water contaminants that were detected during the 2019 calendar year. The presence of these contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done January 1 – December 31, 2019. The State allows us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. All of the data is representative of the water quality, but some may be more than one year old. The State and EPA require us to test our water on a regular basis to ensure its safety. As shown by the table below, the City of Alma water system had no violations of EPA's established Maximum Contaminant Levels. Not listed are the hundreds of other contaminants for which we tested that were not detected. For a complete listing of these contaminants please contact the Water Treatment Plant.

#### Terms and abbreviations used below:

- **Maximum Contaminant Level Goal (MCLG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **Maximum Contaminant Level (MCL):** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- **Maximum Residual Disinfectant Level (MRDL):** The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- **Maximum Residual Disinfectant Level Goal (MRDLG):** means the level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- **N/A:** Not applicable **ND:** not detectable at testing limit **ppb:** parts per billion or micrograms per liter **ppm:** parts per million or milligrams per liter **pCi/l:** picocuries per liter (a measure of radioactivity).
- **Action Level (AL):** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.
- **Level 1 Assessment:** A study of the water supply to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.
- **Level 2 Assessment:** A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.
- **TT:** Treatment technique
- **NTU:** Nephelometric turbidity units

Regulated Contaminant	MCL	MCLG	Level Detected	Range	Year Sampled	Violation Yes / No	Typical Source of Contaminant
Arsenic (ppb)	10	0	2.7	2.4 – 3.0	2019	No	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes
Fluoride (ppm)	4	4	0.75	.43 - .98	2019	No	Additive which promotes healthy teeth
TTHM - Total Trihalomethanes (ppb)	80	N/A	16.63	11 - 26	2019	No	Byproduct of drinking water disinfection
HAA5 Haloacetic Acids (ppb)	60	N/A	2.8	1.7 – 3.8	2019	No	Byproduct of drinking water disinfection
Barium (ppm)	2	2	.0092	N/A	2019	No	Erosion of natural deposits
Beryllium (ppb)	4	4	2.5	N/A	2019	No	Erosion of natural deposits
Cadmium (ppb)	5	5	1.8	N/A	2019	No	Erosion of natural deposits
Chlorine* (ppm)	<b>MRDL</b>	<b>MRDLG</b>	1.21	.64 - 2.31	2019	No	Water additive used to control microbes
	4	4					
Total Organic Carbon	TT	N/A	40% removed 15% is required	33%-45%	2019	No	Naturally present in the environment
Nephelometric turbidity units	95% of 4 hr compliance periods must be less than .34 NTUs		100%<.34 NTUs	0.05-.22	2019	No	Measure of the cloudiness of water due to soil runoff. Used to monitor effectiveness of filtration system
Radioactive Contaminant	MCL	MCLG	Level Detected	Range	Year Sampled	Violation Yes / No	Typical Source of Contaminant
Combined radium (pCi/L)	5	0	0.1	N/A	2013	No	Erosion of natural deposits
Contaminant Subject to AL	Action Level	MCLG	City of Alma Water 90th percentile		Year Sampled	Number of Samples Above AL	Typical Source of Contaminant
Lead (ppb) **	15	0	0		2017	0	Corrosion of household plumbing systems; Erosion of natural deposits
Copper (ppm) **	1.3	1.3	0		2017	0	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
Special Monitoring and Unregulated Contaminant ***			Level Detected	Year Sampled	Comments		
Sodium (ppm)			63 ppm	2019	Typical source is erosion of natural deposits		
Chloride			23 ppm	2019	Typical source is erosion of natural deposits		
Iron			<0.1 ppm	2019	Typical source is erosion of natural deposits		
Sulfate			160 ppm	2019	Typical source is erosion of natural deposits		
Nickel			2.2 ppb	2019	Typical source is erosion of natural deposits		

\* Chlorine was calculated using the running annual average.

\*\* 90 percent of the samples collected were at or below the level reported for our water.

\*\*\* Unregulated contaminants are those for which EPA has not established drinking water standards. Monitoring helps EPA to determine where certain contaminants occur and whether it needs to regulate those contaminants.

**Information about lead:** If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Alma is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Our water supply has no known Lead service lines, however out of a total of 3174 water service lines in the City of Alma there are 103 city water services, and 2243 private water services that are of unknown materials. These unknown services will be identified over the next 5 years and replaced if necessary over the next 25 years.

We will update this report annually and will keep you informed of any problems that may occur throughout the year, should they happen. It is recommended that you keep this report as a reference source as it provides useful information as well as contacts and phone numbers you may need from time to time. For additional information regarding the contents of this report, or to request additional copies contact the City of Alma Water Department at 989-463-8349 or City Hall at 989-463-8346. The report may also be viewed on the City of Alma's website at [www.ci.alma.mi.us](http://www.ci.alma.mi.us). This report will not be sent to you unless requested. For more information about safe drinking water, visit the U.S. Environmental Protection Agency at [www.epa.gov/safewater/](http://www.epa.gov/safewater/).

We invite public participation in decisions that affect drinking water quality. City of Alma commission meetings are held the 2nd and 4th Tuesdays of each month at 6:00pm, Additionally the Gratiot Area Water Authority meets the 2nd Friday of each month at noon. Please check the city's Web page for possible date/time changes prior to the meeting date.

## WINTER CAR CARE & DRIVING TIPS

- Keep your equipment properly maintained and include a winter survival kit in your vehicle: an ice scraper, snow shovel and sand/salt.
- Clear snow and ice off your car – including windows, mirrors, lights, reflectors, hood, roof and trunk.
- Drive with your headlights on, and be sure to keep them clean to improve visibility.
- Avoid using cruise control in snowy or icy conditions.
- Know how to brake on slippery surfaces. Vehicles with anti-lock brakes operate much differently from those that do not have anti-lock brakes.
- If you do venture out or are unexpectedly caught in a snowstorm and encounter problems, stay in your car and wait for help. You can run the car heater to stay warm for 10 minutes every hour, but make sure your exhaust pipe is clear of snow. There is a danger of carbon monoxide poisoning if snow blocks the pipe and enables the deadly gas to build up in your car. Open your window slightly to help prevent the buildup.
- Be cautious on bridges and overpasses as they are commonly the first areas to become icy.
- Avoid passing snow plows and sand trucks.

# FEBRUARY 29 LEAP DAY

# NATIONAL FFA WEEK

## NATIONAL FFA WEEK - ITHACA FEB. 22-29, 2020

**NATIONAL FFA WEEK**

**I believe** in the future of agriculture, with a faith born not of words but of deeds – achievements won by the present and past generations of agriculturists; in the promise of better days through better ways, even as the better things we now enjoy have come to us from the struggles of former years.

**I believe** that to live and work on a good farm, or to be engaged in other agricultural pursuits, is pleasant as well as challenging; for I know the joys and discomforts of agricultural life and hold an inborn fondness for those associations which, even in hours of discouragement, I cannot deny.

**I believe** in leadership from ourselves and respect from others. I believe in my own ability to work efficiently and think clearly, with such knowledge and skill as I can secure, and in the ability of progressive agriculturists to serve our own and the public interest in producing and marketing the product of our toil.

**I believe** in less dependence on begging and more power in bargaining; in the life abundant and enough honest wealth to help make it so—for others as well as myself; in less need for charity and more of it when needed; in being happy myself and playing square with those whose happiness depends upon me.

**I believe** that American agriculture can and will hold true to the best traditions of our national life and that I can exert an influence in my home and community which will stand solid for my part in that inspiring task.

**CONSIDER BRINGING EVERYTHING**

We have surprised many people who thought their items were not valuable enough to consider. The expert evaluators we have gathered together offer you a wealth of knowledge and experience. We are accustomed to paying thousands of dollars for valuable items. Don't miss this opportunity. Perhaps we'll help you find a real treasure in those hidden away pieces. There's never a charge for our consultation or services.

**YOU MAY HAVE THOUSANDS OF DOLLARS WORTH OF ITEMS GATHERING DUST**

Almost everyone has something of value they no longer need or want: Inherited items, jewelry that doesn't fit your style, watches that are old or even broken, silver pieces. Several items that might be useless to YOU.. may be considered treasures by the collectors from our vast international network.

- REASONS TO SELL**
1. Midwest Gold Buyers specializes in evaluation and buying New and Antique jewelry. Our generations of experience qualify us to evaluate everything from small pieces to the finest and most valuable estate jewelry.
  2. Midwest Gold Buyers has an undisputed reputation. We work in compliance with your Local and State Government.
  3. This is an ideal opportunity to have your valuables evaluated (especially if you inherited them) by experts right here in this area. Come in for a free appraisal and cash offer - **NO APPOINTMENT NECESSARY.**
  4. If you are not wearing or enjoying the items that you have, then this is a great chance for you to convert them to **CASH.** This is much better than just holding hard to sell diamonds, jewelry & coins.

## NATIONAL FFA WEEK ALMA FEB. 22-29, 2020

**NATIONAL FFA WEEK**

I believe in the future of agriculture, with a faith born not of words but of deeds – achievements won by the present and past generations of agriculturists; in the promise of better days through better ways, even as the better things we now enjoy have come to us from the struggles of former years.

I believe that to live and work on a good farm, or to be engaged in other agricultural pursuits, is pleasant as well as challenging; for I know the joys and discomforts of agricultural life and hold an inborn fondness for those associations which, even in hours of discouragement, I cannot deny.

I believe in leadership from ourselves and respect from others. I believe in my own ability to work efficiently and think clearly, with such knowledge and skill as I can secure, and in the ability of progressive agriculturists to serve our own and the public interest in producing and marketing the product of our toil.

I believe in less dependence on begging and more power in bargaining; in the life abundant and enough honest wealth to help make it so—for others as well as myself; in less need for charity and more of it when needed; in being happy myself and playing square with those whose happiness depends upon me.

I believe that American agriculture can and will hold true to the best traditions of our national life and that I can exert an influence in my home and community which will stand solid for my part in that inspiring task.
