Need Fall Forage?

Check out the multiple options for late summer/early fall planted annual forages. These options are great for grazing or stored forage.

Forage Oats - Our forage oat varieties are second to none for leafiness and palatability. Expect good tonnage and high quality feed from our lineup of leafy, late heading forage oats.

Oats Plus - Forage oats mixed with ryegrass for fall and spring grazing. Great for full season grazing!

Triticale - TriCal 815 is the premier forage triticale on the market. Characterized by wide leaves and aggressive leaf to stem ratio, 815 will yield big. 815 is an extremely winter hardy variety.

Triticale Plus - TriCal 815 blended with forage type ryegrass for a mix that is great for one fall and one spring grazing/harvest or multiple spring grazings/harvests.

Double Play - A mixture of forage oats, TriCal 815 and annual ryegrass. Designed to be planted in late summer and harvested in both fall and spring. Oats will freeze out, leaving the 815 and ryegrass for spring forage.
