CBD!!! CBD !!! What is CBD?

By Lori Kleinsmith

Cannabidiol, better know as CBD, is becoming a popular natural remedy used for many common ailments. CBD is one of the 104 chemical compounds known as cannabinoids found in the cannabis or marijuana plant. Tetrahydrocannabinol (THC) is the main psychoactive cannabinoid found in cannabis, and causes the sensation of getting "high" that's often associated with marijuana. However, unlike THC, CBD is not psychoactive. You do NOT get a "high" from taking CBD.

The fact that you don't get a "high" makes CBD a very appealing option for those who are looking for pain relief and other symptoms without the "high" you get from marijuana or certain pharmaceutical drugs. CBD oil is made by extracting CBD from the cannabis plant, then diluting it with a carrier oil like coconut or hemp seed oil. The health benefits of CBD oil is backed by scientific evidence and is gaining momentum in the health and wellness world. Some scientific studies confirming it may help a variety of ailments like chronic pain and anxiety. Also helping with acne, alleviating cancer-related symptoms, decreasing inflammation, lowering blood pressure and so much more.

Are there any side effects? Most people experience no side effects. Some of the side effects may be drowsiness, dry mouth and change in appetite. As always it is best if you consult your doctor before starting CBD oil to avoid any drug interactions. When buying CBD oil you want a good quality oil. There are many subquality oils out there on the market. Look for the "MG". If you have a 30 ml bottle and the "MG" is only 100mg that is not very potent. There are usually 1000 drops in a 30ml bottle. Look for 1000mg (1mg per drop) or more per 30ml bottle. Some oils are flavored and some are natural tasting. Have questions? Feel free to stop in at Pinnacle Hypnosis and Therapies, 400B South 4th St., Hamburg, PA 19526, 610-823-4160 for more information and to try a sample of CBD pain cream. We carry a full-line of CBD pain creams, lotions, balms, oils, gummies, gelpacs, concentrates, massage oil. Pricing starting at \$10.00 for travel sizes on up. Also available in doggie chews. Perfect for older pets or calming down that frightened pet. Open Wednesdays 9 am to 5 pm and NOW OPEN Saturdays 11 am to 2 pm. All other times by appointment. www.pinnaclehypnosis.com.

HEALTH, MIND & SPIRIT

5 Tips To Keep Your Spine Healthy

A healthy spine is an essential part of maintaining a healthy lifestyle. Unfortunately, people often overlook this fact, even though research shows as many as 80 to 90 percent of people will experience low back pain at some point in their lives. Here are 5 tips for keeping your spine healthy:

GET ACTIVE

Staying active and exercising at least three times a week can help you maintain a strong and healthy spine. Your chances of experiencing low back pain significantly decrease with regular physical activity. Activities that support a healthy spine include walking, swimming, biking or going to the gym.

AVOID LIFTING MISHAPS

When lifting, ensure it is done the right way. Stand as close to the object as you can. Use your legs and knees rather than your back to lift. Bend your knees so that your arms are at the same height as the object. Most importantly, if the object is too heavy for you to lift alone, get assistance.

WATER, WATER, WATER

Drink plenty of water to hydrate, which in turn helps maintain soft tissue elasticity and fluidity in joints. The intervertebral (spinal) disks can shrink when the body is not hydrated properly. Dehydration can contribute to painful disk conditions, such as a herniated or bulging disk that can further result in sciatica.

WATCH YOUR POSTURE

To protect your spine, maintain good posture by standing, walking, sitting and lying in positions where the least strain is placed on supporting muscles and ligaments. Remember to always sit up straight with your head and back in good alignment. Avoid rolling your shoulders forward and slouching. Keep your feet touching the floor or supported when sitting.

ERGONOMICALLY CORRECT WORKSPACE

Using proper ergonomics during work can help reduce any stress on both the lower and upper back, and can also minimize spinal pain and conditions

ranging from stiff back to sciatica. Ensure that your work station fits you by adjusting the chairs and armrests to be at your ideal level for your height and functionality. Don't stay in one position for too long. Doing so can cause your back muscles to tighten up and add strain to your spine. Move around by taking short breaks to get up and walk around the office or home. These five tips may help you to improve the overall health of

your spine. Always remember to pay attention to any warning signs of spinal problems or pain. Listen to your body. If you encounter low back pain, contact your doctor, physical therapist or other medical professional for assistance. David McAuliffe, OTR/L, MSPT, is the site manager of Good Shepherd Physical Therapy, 500 Hawk Ridge Drive, Hamburg. He specializes in orthopedics, sports and work-related injuries.
