HOME IMPROVEMENT**Simple ways to improve a kitchen pantry**

People have been spending more time at home in 2020 than in years past, and certain projects around the house have become a priority. One home improvement idea that serves the double benefit of creating organization and making cooking at home more efficient is to reimagine the kitchen pantry.

A pantry is a room or closet where food, beverages and linens or dishes are stored. Pantries can be highly useful spaces that provide ancillary storage in kitchens. Many modern homes are equipped with pantries, but older homes may require some modification to create more useful pantries. Whether starting from scratch or modifying an existing pantry, these tips can help projects go more smoothly.

▪ Maximize vertical storage. Utilizing vertical ar-

reas can help increase storage capacity. Build in extra nooks by investing in under-shelf storage baskets. These baskets can instantly create designated areas for different types of ingredients. Homeowners also can look for ways to use the inside of cabinet doors or add extra shelves on walls or in eaves.

▪ Consider your needs. Figure out which items you would like to store in the pantry and then shop for corresponding storage systems. For example, storage solutions may feature wine bottle racks, baskets for potatoes and other produce, shelving for small appliances, and even pull out racks for baking pans or cutting boards.

▪ Use clear storage. Put ingredients in clear, airtight containers of similar dimensions so that you can easily find items you need. Transfer bulky items, like cereals and baking supplies, to storage containers for uniformity.

▪ Store bulk items elsewhere. Bulk shopping can be

cost-efficient, but bulk items can quickly eat up real estate in the pantry. Designate another area for non-perishable bulk products, like paper goods or canned items, such as in a garage or utility room.

▪ Pull out drawers are convenient. Pull-out drawers can reduce the need to seek and reach for items. These drawers conveniently roll out so items in the back can be accessed without disturbing foods in the front. Drawers can be custom built for any pantry space.

▪ Make it accessible. Think about who will be taking items from the pantry. Put children's snacks on the bottom pantry shelf where they can reach them, and then organize other shelves for adults in the home.

A pantry remodel can add valuable storage space and make one of the busiest rooms in the house operate more efficiently.

HOME IMPROVEMENT

Signs your gutters are in need of repair

Fall is a great time to tackle projects around the house. The weather each fall allows homeowners to make improvements to their homes' exteriors without worrying about extreme heat or cold, while interior projects like painting are made easier because homeowners can open the windows to allow for proper ventilation.

Fall also marks a great time to prepare for upcoming projects that can make winter work that much easier. For example, fall is a great time to take stock of your gutters so you can address any issues before leaves begin to fall or the first snowstorm touches down. Compromised gutters can contribute to water issues in basements and adversely affect a home's foundation if not addressed immediately, so it behooves homeowners to learn the signs that gutters are in need of repair or replacement.

· **Gutters hanging off the home:** Gutters were once installed predominantly with spikes. However, many industry professionals now install gutters with hanger brackets. Why the change? Spikes loosen over time, leading to the gutters hanging off the home. That can contribute to serious issues if left untreated. Gutters hanging off the home need not necessarily be replaced, but rather secured to the home, ideally with hanger brackets instead of spikes. Brackets hook into the front of the gutter and are then screwed into the fascia of a home. A professional who specializes in gutter repair can perform this task relatively quickly, and it's an inexpensive yet highly effective

solution.

· **Gutter separation:** Gutters that are no longer fastened together can leak and contribute to issues that affect the home's foundation, siding and appearance. Clogs and the accumulation of debris can cause gutters to separate because they are not designed to hold too much weight. Replacement of separated gutters may or may not be necessary depending on how big the problem is and the condition of the existing gutters. If replacement is not necessary, separated gutters may be remedied by securing the joints, another relatively simple and inexpensive fix.

· **Peeling exterior paint:** Paint that appears to be peeling off of your home may indicate that water is seeping over the edge of the gutter closest to your home. When that happens, water is coming down the side of the house, causing the paint to peel. In such instances, replacing the gutters is often necessary.

· **Basement flooding:** Not all signs of deteriorating gutters are outside a home. Many a homeowner has been flummoxed by flooding in their basements, and such flooding can be caused by aging, ineffective gutters. That's because deteriorating gutters sometimes allow water to leak near the foundation of a home, contributing to basement flooding.

Fall is an ideal time to inspect gutters and have any issues fixed before leaves begin to fall or harsh winter weather arrives.
