Who do you want to be tomorrow?

* "I find it helpful to set calendar reminders on my phone for working out and meal prepping. I have to treat it like a job so that I'll do it. Thought that might help other people who struggle." -- S.O. in Wyoming

* "Those hide-a-key rocks can be a little obvious -- at least they are to me. I have a spare key hidden outside too, but I sealed mine in a plastic baggie and buried it in a spot known only to our family members. Also, it's not right by the door." -- I.E. in Mississippi

* Home office motivation: Preplan your outfits for daily success. When it's all too easy to roll out of bed and log on without a thought, it might help your productivity to prepare for the workday as you would have in the time of commutes and conferences. The right wardrobe choices can help you set the tone for the day.

* "When closing up our cabin for the season, we brought a box of mothballs and scattered them around the porch perimeter. This keeps the small animals like mice and skunks from setting up shop there while no one is around." -- S.F. in Pennsylvania

* Now's a great time to start weatherstripping! Check and recaulk windows. Caulk along baseboards to deter drafts. Add insulation to electrical outlets and under sinks around plumbing. Seal it up to stay toasty this winter.

* "When temperatures fall where I live, outside exercise becomes preferred. We all know to drink lots of fluids in the blazing heat of summer, but it's important to plan your hydration when extreme sweating isn't the norm. You still need to replace fluids for optimal performance." -- T.D. in Florida

Send your tips to Now Here's a Tip, 628 Virginia Drive, Orlando, FL 32803.

ARIES (March 21 to April 19) Some flashes of Aries ire might erupt as you confront an unusually bewildering situation. But you should be able to keep your temper under control as you work through it.

TAURUS (April 20 to May 20) That marriage 'twixt the arts and practicality that Taureans excel at once again highlights your enjoyment of much of the week. However, you need to watch any sudden urge to splurge.

GEMINI (May 21 to June 20) Even with all the plusses apparently outweighing the minuses, you still might want to defer an important decision to make sure you have all the facts you need.

CANCER (June 21 to July 22) One or two problems might threaten to derail otherwise smoothly running situations at work or at home. But a few well-placed words should help get things back on track quickly.

LEO (July 23 to August 22) This could be a good time for all you Leos and Leonas in the spotlight to open your generous Lion's hearts and share the glory with those who helped you accomplish so much along the way.

VIRGO (August 23 to September 22) You might want to get advice from someone who's been there and knows these situations better than you do, before investing time or money (or both) in a questionable matter.

LIBRA (September 23 to October 22) Be careful how you handle a workplace matter that seems out of place in the schedule you've prepared. Before you act, one way or another, find out who set it up and why.

SCORPIO (October 23 to November 21) Your entertainment aspect is strong this week. Besides providing a wonderful break from everyday obligations, sharing fun times brings you closer to those you care for.

SAGITTARIUS (November 22 to December 21) Having a weekend fun fest? Your friend or relative who's down in the emotional dumps could perk up if you find a way to include him or her in your plans.

CAPRICORN (December 22 to January 19) If you're in one of those "the Goat knows best" periods, you might want to ease up and try listening to what others have to say. You could learn something.

AQUARIUS (January 20 to February 18) That new challenge is getting closer, and you should be out there now showing facts and figures to potential allies to help persuade them to rally to your support. Good luck.

PISCES (February 19 to March 20) Getting a head start on holiday plans could help free up some time later to spend on other projects. Meanwhile, a colleague has some ideas that you might find worth discussing.

BORN THIS WEEK: You are always there for others, and sometimes you need to be reminded that you need to be there for yourself as well.

Getting Away

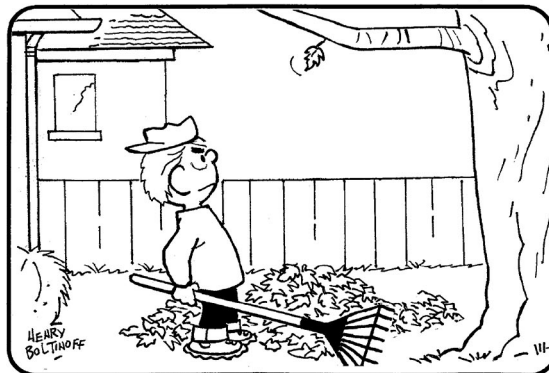

Getting away from their high-stress jobs, a couple spends relaxing weekends in their motor home. When they found their peace and quiet disturbed by well-meaning, but unwelcome, visits from other campers, they devised a plan to assure themselves some privacy.

Now, when they set up camp, they place this sign on the door of their RV: "Insurance agent. Ask about our term-life package."

HOCUS-FOCUS BY HENRY BOLTINOFF

Find at least six differences in details between panels.

Differences: 1. Window is cracked. 2. Boy's hair is different. 3. Bushes are missing. 4. Pile of leaves is larger. 5. House is narrower. 6. Shirt has long sleeves.

Call Policy

The local high school has a policy that the parents must call the school if a student is to be absent for the day. Kelly (name changed to protect the guilty), deciding to skip school and go to the mall with her friends, waited until her parents had left for work and called the school herself. This is the actual conversation of the telephone call.

Kelly: "Hi, I'm calling to report that Kelly so-in-so is unable to make it to school today because she is ill."

Secretary at high school: "Oh, I'm sorry to hear that. I'll note her absence. Who is this calling?"

Kelly: "This is my mother."

Taking Charge of Your Health: How Your Primary Care Provider Can Help You Stay Ahead of the Curve

by Stephanie Crumpton, NP

Since the onset of COVID-19, many of us have probably focused more intently on our health than ever before – paying close attention to how we are feeling, staying alert to any signs that we might not be well and doing what we can to stay healthy. While a pandemic is certainly a bad thing, being more in tune with and focused on our health is definitely a good thing.

Typically, most of us will visit a doctor when we are sick, experiencing a new health problem or are in pain. However, to truly optimize our health, it is important that we visit our primary care provider for regular check-ups – even when we are well.

Annual physical exams can play a very important role in your health. While a yearly examination may seem unnecessary, especially if you feel great, this regular visit with your primary care provider can offer valuable help in preventing health surprises and setbacks down the road. Early diagnosis of many conditions – from cancer to heart disease and other ailments – offers the best chance to achieve the best outcome possible and help keep you on the road to good health.

Additionally, regular primary care can help you establish a healthy and trusting relationship with your provider, making it easier and more comfortable for you to discuss any health concerns you have with a healthcare professional who can help.

So, what is a primary care provider?

Primary care providers include family physicians, general practitioners, general pediatricians and geriatricians, and nurse practitioners. They commonly diagnose new illnesses, help manage chronic conditions, advocate for preventive care and help protect the overall wellness of their patients.

They are usually your first contact when seeking care and your principal point of continuing care. In fact, continuity is a key characteristic of primary care. Having a go-to primary care provider offers you a trusted source for routine check-ups, preventive care and conversations about your health concerns. Your provider knows and understands your health history and potential risk factors, which gives them a more complete picture of your health and how to best manage it.

What happens during an annual exam with a primary care provider?

Your primary care provider uses your regular check-ups to see how your body is performing and monitors your vital signs, including weight, blood pressure, cholesterol and other important health markers. Depending on your personal health history, your primary care provider might choose to focus on certain areas during your exam, like additional blood pressure and cholesterol screenings if you have a family history of heart disease.

Beyond monitoring and improving your health, an annual check-up allows you and your provider to develop a strong provider-patient relationship, which can go a long way in helping identify even the smallest changes in your health or lifestyle. If you suffer from any chronic conditions, your primary care provider can help you manage them and stay tuned in to any changes in your condition that may need attention.

Yearly exams are also the best way for a primary care provider to ensure that you are getting the preventive health screenings and important vaccinations you need at the right times.

Are annual exams expensive?

Getting an annual exam doesn't have to be expensive. In fact, most insurance plans fully cover one check-up each year. You should contact your insurance provider for details regarding your plan's coverage.

If you haven't scheduled your annual check-up, now is a great time to get it on the calendar. Provider offices are taking extra precautions to protect the health and safety of their patients, so it's never been safer to visit your primary care provider. Your primary care provider may even have a few more openings for annual exam visits than usual.

If you don't have a primary care provider, Sovah Internal Medicine can help. Call our office at 434.791.1345/Visit the "Providers" tab at SovahPhysicians.com, and get connected with primary care today to help you stay healthy for all your tomorrows.
