THE IMPORTANCE OF COLORECTAL CANCER SCREENING

If you are age 50 or have a history of colon cancer in your family, this information is for YOU...

- According to the American Cancer Society, excluding skin cancers, colorectal cancer is the third most common cancer diagnosed in both men and women in the United States.
- When colorectal cancer is found through a screening, and not because someone already has developed symptoms, it is less likely to be widespread, and is more likely to have a better prognosis.
