Battleships

Each Battleship puzzle represents an ocean with a hidden fleet of ships, which may be oriented horizontally or vertically within the grid such that no ship touches another, not even diagonally. The numbers on the right and on the bottom of the grid show how many squares in the corresponding row and column are occupied by ship segments. Occasionally some squares may contain given ship or water segments to help start the puzzle. The object is to discover where all ships are located.

Difficulty Level ★★★

Hashi

Each puzzle is based on a rectangular arrangement of islands where the number in each island tells how many bridges are connected to it. The object is to connect all islands according to the number of bridges so there are no more than two bridges in the same direction. Bridges can only be vertical or horizontal and are not allowed to cross islands or other bridges. When completed, all bridges are interconnected, enabling passage from any island to another.

SOLUTION

Guess Who?

I am an actor born in New York on October 21, 1983. As a youth, I was active in sports, playing golf, soccer and basketball. I also enjoyed theater and majored in musical theater. I have played many roles on Broadway, and starred as Danny Zuko on TV.

Answer: Aaron Tveit

WORD SCRAMBLE

Rearrange the letters to spell something pertaining to popcorn.

HAERTTE

Answer: Theater
