Healthy Hand Hygiene Habits

Proper
handwashing helps
all of us stay healthy,
so remember to be aware
and do your part to help
protect yourself and
others!

Protect yourself against COVID-19

and other diarrheal and respiratory illnesses, and help prevent the spread of germs to others, by following these simple hand hygiene guidelines:

- 1. Wash your hands with soap and warm water, lathering for at least 20 seconds.**
- 2. If soap is unavailable, use a hand sanitizer containing at least 60 percent alcohol to clean your hands.**

Wash your hands throughout the day, and particularly under these circumstances:

- Before preparing food
- Before eating
- After using the toilet
- After changing a diaper or helping a child use the toilet
- Before and after exposure to someone who is sick
- After coughing, sneezing or blowing your nose
- After touching an animal or picking up animal waste
- After handling pet food or treats
- After handling garbage or garbage cans
- Before and after attending to a cut or wound
