READER'S Recipe

BUFFALO-STYLE CHICKEN PIZZA

FOR DOUGH
2 cups bread flour or
all-purpose flour
1-1/4 tsp. active dry yeast

FOR TOPPING:
2/3 cup blue cheese dressing
3 boneless, skinless chicken
breasts, cooked and cubed
(about 2-1/2 cups)

MAKE DOUGH:

Stir together flour, yeast, and salt in a large bowl, then stir in warm water. Knead in bowl until smooth. Shape dough into a ball and let rise, covered, in a warm place until doubled in volume, about 2 hours.

Sprinkle cornmeal on a work surface and set dough ball on it. Let rest, covered with towel, 30 minutes.

Preheat oven to 425°F. Grease a 12-inch pizza pan (or a 14-inch pan or 9x13-inch baking sheet for a larger, thinner crust). Roll out dough into a 12-inch circle; transfer to prepared pan, building up edges slightly.

MAKE TOPPING:

Spread blue cheese dressing over crust. Stir together chicken, hot sauce, and butter in a bowl until well combined; spread over crust. Sprinkle with mozzarella.

Bake until crust is golden and cheese is bubbly, 20 to 25 minutes. Remove from oven and let stand 10 minutes, before slicing. If desired, sprinkle with chopped celery and grated Parmesan cheese.

1/2 tsp. salt
3/4 cup warm water
2 Tbsp. cornmeal

1/4 cup hot sauce
2 Tbsp. butter, melted
1 (8 oz. pkg.) shredded
mozzarella cheese

Quit Smoking With Hypnosis

By: Lori Kleinsmith, NLP, Certified Hypnotist

Many people have good intentions to quit smoking. Then something triggers them to fall back into the dangerous habit. Many times it is the ugly stress monster. How will hypnosis help you quit and what is hypnosis?

The word hypnosis itself is defined by being an altered state of consciousness or awareness where the individual under hypnosis appears to be in a trance-like state. This trance-like state is very familiar. Example: Have you ever been talking with someone and you are watching them speak but your mind goes elsewhere? Have you ever driven a car and all of a sudden you are at your destination but really don't remember most of the drive? These are all trance-like states. Just like in hypnosis, you were in control.

Hypnosis is commonly used in the treatment of a variety of

physiological and physical problems. It is currently utilized in the treatment of pain control, weight issues, stress management, and addiction problems. There is statistical information that shows that for some, it does indeed work, and very well. There are many variables. Do you really want to quit?

The basic principle of hypnosis for quitting smoking is to bring those unhealthy thoughts to the surface and to replace them with more positive thoughts that encourage the smoker to cease leaning on something so dangerous to one's health. In many cases, a hypnotherapist will also teach the individual the art of self-hypnosis. This gives control to the individual not the cigarettes.

There is no doubt that hypnosis itself, in general, doesn't work for everyone. Nothing works for everyone. Some people have reported that after just one ses-

sion, they were 'turned off' to the idea of ever smoking again and simply did not want to smoke any longer. Many of those reported that this had worked for them indefinitely. While still others reported similar immediate results, but having had relapsed during high stress moments and fell back into the smoking habit once again.

For this reason, most hypnotherapists will suggest to their clients that they continue with self-hypnosis, even once they consider themselves smoke free. It is important to be ultra-aware when you are dealing with stressful moments and make sure you turn back to smoking cessation therapies before you turn back to a smoke.

Reiki Healing Energy For A Balanced Life

What Exactly Is Reiki?

It is a gentle, hands-on method of healing. Those who perform Reiki have received specific training, and are initiated into the healing ray. This training then allows the practitioner to direct the healing energy onto the client, as they peacefully rest on a massage table, fully clothed.

Reiki is not a religion. It is a technique that addresses both chronic and acute conditions. This then promotes balance within all the body's systems and the regenerative aspects of body and mind.

Reiki can reduce or alleviate pain and stress. It will also help with more restful sleep, help enhance healing, and promotes relaxation. It has helped many
