UTILITY TRAILER FOR SALE

For those who worship their God on the 1st day or the 7th day of the calendar week: In 46 B.C. Julian's calendar aligned the equinoxes and gave his Lord the sun a day to be worshiped on the 1st day of the week and called it Sunday. Then his Lord Saturn to be worshiped on the 7th day of the week and called it Saturday, for Caesar worshiped Baal. This was implanted as a new covenant to appear Biblical and forced (even by death) for Christian worship and after some 800 years accepted. In 1582 Pope Gregory the XIII made his own calendar to align the equinoxes with 10 less days than the Julian calendar and the same Baal days to fall on the 1st and 7th day of the week. Many have been given a reprobate mind to accept sin as truth and think they are saved in The Name of Jesus, but do not obey Him! All will give account on judgment day (Mt 12:36-37, Rev 21:6-8, 22:14-15)! Ron Westmoreland 256-590-9067

WE ARE MOVING

After 20 years in the Cullman Shopping Center, low traffic and construction makes it necessary for us to move our events for them to survive. Our NEW LOCATION will be next to the East Side of Wal-Mart's parking and in front of Carmike Cinemas (Marketplatz Center). Mr. Roy Drinkard has graciously invited us to use this space.

We are very thankful for each of you who have faithfully supported us and we ask for your support in our new location so we can continue to offer scholarships, support the annual steer and heifer show, & several other things we help with when we have earnings exceeding our cost.

Long-term overtreatment with the anti-clotting drug warfarin, combined with antiplatelet therapy with aspirin or clopidogrel to prevent stroke, may raise the risk of dementia in people with atrial fibrillation, according to research presented at the American Heart Association's Scientific Sessions 2014. Atrial fibrillation is a common heart rhythm abnormality that raises the risk of stroke and all common forms of dementia. The mechanisms behind the association of atrial fibrillation and dementia are unknown.

A new study found 45 percent of patients with respiratory tract infections (RTIs) were inappropriately prescribed antibiotics in an outpatient practice of general internal medicine and family medicine. The study was published in Infection Control & Hospital Epidemiology, the journal of the Society for Healthcare Epidemiology of America (SHEA). In the ambulatory care setting, antibiotics are often prescribed inappropriately for RTIs. Such infections, which include bronchitis, acute pharyngitis (i.e., sore throat) and upper RTI, often do not require antibiotic interventions. Excessive antimicrobial use has been linked to increased healthcare costs and the emergence of antibiotic-resistant bacteria.

The U.S. Food and Drug Administration has approved Cosentyx (secukinumab) to treat adults with moderate-to-severe plaque psoriasis. Psoriasis is a skin condition that causes patches of skin redness and irritation. Psoriasis is an autoimmune disorder, and occurs more commonly in patients with a family history of the disease, and most often begins in people between the ages of 15 and 35. The most common form of psoriasis is plaque psoriasis, in which patients develop thick, red skin with flaky, silver-white patches called scales.
