### GANACHE-TOPPED PUMPKIN TART

- |                                   |                                       |
|-----------------------------------|---------------------------------------|
| 1 cup all-purpose flour           | 1 tsp. pumpkin pie spice              |
| 3/4 cup sugar                     | 1/2 tsp salt                          |
| 1/2 cup baking cocoa              | 1/2 cup butter, melted                |
| <b>FILLING</b>                    | 2 tsp. grated orange zest             |
| 1 can (15 oz.) pumpkin            | 2 tsp. pumpkin pie spice              |
| 3 large eggs                      | 1/4 tsp. salt                         |
| 3/4 cup packed dark brown sugar   | 1/2 cup heavy whipping cream          |
| <b>GANACHE</b>                    | 1/2 cup heavy whipping cream          |
| 3/4 cup semisweet chocolate chips | Crystallized ginger, chopped optional |

Preheat oven to 425°. In a large bowl, combine flour, sugar, baking cocoa, pie spice and salt. Stir in the butter until crumbly. Press onto bottom and up sides of a 9-in. tart pan with removable bottom; place on a baking sheet. Bake for 10 minutes; cool on a wire rack. Meanwhile, in another large bowl, whisk pumpkin, eggs, brown sugar, orange zest, pie spice and salt. Slowly whisk in cream. Pour into crust. Bake 15 minutes. Reduce oven temperature to 350°. Bake until the filling is set, 40-45 minutes. Cool on a wire rack. For ganache, place chocolate chips in a small bowl. In a small saucepan, bring cream just to a boil. Pour over chocolate; let stand 10 minutes. Stir with a whisk until smooth. Spread over tart; chill until set. If desired, garnish with crystallized ginger.

# HEALTH, MIND & SPIRIT

## How To Improve Circulation

The human body is a complex, efficient machine. One highly important component of that machine is the circulatory system, which sends blood, oxygen and nutrients throughout the body.

In perfectly healthy bodies, blood, oxygen and nutrients circulate throughout the body without issue. However, several conditions, including obesity and diabetes, can contribute to poor circulation, which is not a standalone condition but rather a byproduct of another serious health issue.

According to the health information site Healthline, when the circulatory system is not working at optimal capacity, people may experience tingling, numbness and throbbing or stinging pain in the limbs. Pain and muscle cramps also may result from poor circulation, the symptoms of which vary depending on the causes. For example, someone whose circulation issues are a result of peripheral artery disease may experience different symptoms than someone whose circulation has been compromised by diabetes.

Because issues affecting the circulatory system are complex, it's important for men and women to learn how to address such issues if they suspect their systems have been compromised.

• Poor circulation results from various health issues, so people who think they are dealing with poor circulation should not try to address the issue on their own. Rather, the best way to

improve circulation is to visit a physician the moment you note a symptom. Doctors will confirm if patients are experiencing circulation issues and diagnose what's causing those issues. Doctors also will work with their patients to devise a course of treatment for the issue that's causing their poor circulation.

• If necessary, try to lose weight and keep it off. Obesity is one of the conditions that can contribute to poor circulation. So many people who are diagnosed with poor circulation may be advised to lose weight and keep the weight off once it's been lost. A healthy diet that includes fish like salmon that is high in omega-3 fatty acids, which have been shown to improve circulation, can help people lose weight and maintain healthy weights going forward.

• Consider yoga. A review of an assortment of peer-reviewed studies found that yoga can have a positive impact on risk factors for cardiovascular disease. A low-impact exercise, yoga can compress and decompress veins, potentially improving circulation. It takes time to master yoga positions, but even beginners who cannot fully perform poses during a yoga regimen can benefit from doing the exercises to the best of their abilities.

Poor circulation is a byproduct of various conditions. Once a condition has been diagnosed, patients can help themselves by taking various steps to improve their circulation.

## How To Sanitize A Mobile Phone

The most germ-addled item in your home may not be the toilet or the kitchen sponge. Mobile phones pick up bacteria wherever they go. In addition, users touch their phones an average of 47 times a day according to the national average determined by a Deloitte research survey, introducing new contaminants to the device each time they do so.

Researchers at the University of Arizona found that cell phones carry 10 times more bacteria than many toilet seats, and there may be as many as 17,000 bacterial gene copies on the average high-schooler's phone.

While cell phone safety often focuses on protecting data, smartphone users also should consider keeping their phones clean to remove the potentially harmful microbes that accumulate on phones every day.

Avoid excess moisture when cleaning cell phones, advises the home and lifestyle experts at The Spruce as moisture can damage internal components. Most cell phone screens have an oleophobic coating that repels oils from hands and fingers. Harsh cleansers or abrasive materials on the glass can prematurely remove this coating and/or scratch the surface.

While you clean at your own risk, many tech experts suggest a spray mixture of distilled water and isopropyl alcohol applied to a microfiber cloth to remove surface contaminants. Don't directly wet the phone. There also are pre-packaged cleansers sold for electronics

usage. Invest in an antimicrobial cover to provide an added layer of protection for the phone.

Other ways to keep a phone clean are to wash your hands before use and to try to keep the phone away from areas that may be vulnerable to germs, such as bathrooms.

Energy levels tend to ebb and flow throughout a typical workday. A cup of coffee may provide some caffeine-infused spark in the morning, but a big lunch can squash energy later in the afternoon.

Waning mental sharpness as the workday progresses can compromise productivity, making it more difficult for workers to complete projects on time. That, in turn, can contribute to stress. In fact, in its "2017 Stress in America" survey, the American Psychological Association found that 58 percent of Americans say work is a significant source of stress.

Staying mentally fresh during a workday can pay a host of benefits, and the following are just a few ways to maintain mental focus until quitting time.

• Exercise regularly. The physical benefits of routine exercise are well documented. But even the most ardent fitness enthusi-

## Stay Mentally Fresh During The Workday

asts may not realize just how big an impact physical activity is having on their brains. The Harvard Medical School notes that exercise stimulates regions of the brain that release a chemical called brain-derived neurotrophic factor, or BDNF, which rewires memory circuits so they can function better. A stronger memory can help workers recall project details and deadlines more easily, even as the workday draws to a close.

• Avoid the "quick fix." Relying on a beverage or snack to provide a quick mental boost may end up compromising your mental sharpness. Foods and beverages that are high in sugar may provide an immediate energy boost, but that spike is almost instantly followed by a crash that can adversely affect your mental sharpness. Stick to healthy snacks, such as fruits and vegetables, and avoid late

afternoon cups of coffee, which studies have shown make it harder to fall asleep at night, thereby compromising your energy levels the next day.

• Take a walk outdoors. Spending some time outdoors during a lunch break, or even a quick, post-lunch stroll around the office grounds, can provide a break for the brain. That break can help the brain refocus, improving productivity as a result. One great way to get outdoors during busy workdays is to conduct meetings outside when the weather permits. This gives everyone a chance to recharge their brains in the great outdoors, and few people would prefer a dusty conference room to a nearby park or picnic area outdoors.

Various strategies can help working professionals maintain their mental sharpness throughout the workday.

**Tips Before Buying New Tires**

Though vehicles can't function without them, tires are something few drivers think about until something goes wrong. A roadside flat tire or a tire rotation recommendation from a mechanic during a routine oil change appointment may be the only time many drivers give much thought to their tires. That no doubt leads to some confusion about what to do when tires inevitably need to be replaced. The automotive resource Kelley

Blue Book notes that the life expectancy of most tires falls between 25,000 and 50,000 miles. That's a big gap, and car owners can check their vehicle manuals to see if their vehicle manufacturer recommends a more specific replacement interval. It's worth noting that mileage is not the only barometer drivers should use to determine if they need to buy new tires. The following tips can help drivers determine if now is the time to outfit their vehicle

with new tires.

- Measure the tread. KBB notes that a tire assessment should always include measuring the amount of remaining tread. Drivers can do this on their own in various ways. One method involves looking at the tread wear bars, which are little bridges in the grooves between the ridges. If the bars are even with the tread pattern, then the tire has very little tread remaining and must be replaced. The penny or quarter test is a popu-

**BUYING WRECKED, RUNNING OR DISABLED CARS • TRUCKS • VANS • EQUIPMENT • FORKLIFTS**

Drive in or We'll Pick Up!  
Call: 570.754.7491

**NAFTZINGER USED AUTO PARTS**  
S. 7th St., Box 223, Auburn, PA 17922  
Open Mon.-Fri. 8:30-4:30; Sat. 8:30-2:00; Sun. Closed

lar way to determine if tires must be replaced. Insert a penny or quarter into the center of the tread between two ridges with Lincoln's or Washington's head facing you. If you can see the very top of the head or the space above the head, the tire must be replaced. If only a little bit of hair is visible, then the tire is nearing its end. The tire has sufficient remaining tread if the some of the forehead is concealed.

- Check for other signs of wear and tear. Little remaining tread is not the only sign tires must be replaced. Tires with cracked sidewalls, discoloration and/or bulging need to be replaced.
- Confirm a larger issue isn't lurking. Uneven wear on tires is typically a byproduct of a larger issue. Though tires that have worn unevenly will need to be replaced, replacing them without correcting the larger issue will only lead to more uneven wear on the new tires. That's a costly mistake. KBB notes that poor wheel alignment or suspension issues are typically to blame for uneven wear. This issue can be fixed and should be addressed prior to purchasing a new set of tires.

Tires sometimes exhibit telltale signs that they need to be replaced. Before buying replacement tires, drivers can inspect their existing ones and ask their mechanic to confirm that a larger issue isn't affecting their performance.

## DISCOVERER A/T<sup>3</sup>™

### All-Season All-Terrain

The Discoverer A/T<sup>3</sup>™ is an all-season, all-terrain tire designed to perform well on the highway and off for drivers of pickup trucks.

- Excellent highway performance
- Excellent wet traction
- Improved treadwear and traction in rocky and gravel terrain

**Wide Circumferential Grooves**  
Improves soft surface traction, aids in the tires' ability to clean itself, resistance to hydroplaning and stone retention.

**Aggressive 5-Rib All-Terrain Design**  
For all-terrain performance, all-season traction, stability, handling and treadwear.

**Coupled Tread Elements**  
Excellent stability and confident handling.

## EVOLUTION WINTER™

Provides stability and confidence when driving through deep snow.

- Plows through snow
- Studdable for extreme ice traction
- Made in the USA

M+S Rated

**Fits Cars/Minivans and SUVs/CUVs**

**Standard Limited Warranty Severe Weather Rated**

## KANTNER'S TIRE SERVICE, INC.

230 South Franklin Street, SHOEMAKERSVILLE • 610-562-2567

OUT-THE-DOOR TIRE PRICES

All Tire Prices Include Mounting, Balancing, And New Valve Stem

### Safety In Numbers: Why It Pays To Replace Headlight Bulbs In Pairs

(MS)- When it comes to vehicle maintenance, the rule of two has long reigned among professional automotive technicians and driving safety advocates. In accordance to this rule, drivers replacing important parts in their cars and trucks, such as tires, brakes, shocks and wiper blades, should always do so in pairs.

Replacing parts in pairs can ensure vehicles are properly balanced and functioning safely. But it's not just tires, brakes and other big-ticket components that should be replaced in pairs. Vehicle lighting plays an integral role in keeping drivers and their passengers safe, and motorists should exercise the same caution regarding their vehicles' headlights, taillights and turn signals that they do when maintaining the rest of their cars and trucks.

**WHY REPLACE AGING HEADLIGHT BULBS?** - Few drivers include headlight bulb replacement in their vehicle maintenance routines. But old headlight bulbs can drastically compromise visibility at night, when drivers' visual acuity is naturally reduced by as much as 70 percent. As headlight bulbs age, the effects of exposure to sunlight, ozone and pollution can significantly reduce their light output. According to Philips Automotive, a leading manufacturer of vehicle lighting components, headlight bulbs begin to project significantly less light within two to three years of their initial usage, producing dimmer light outputs that compromise the safety of drivers and their passengers. For example, new headlight bulbs capable of projecting 240-foot beams in front of a vehicle may see that projection dwindle to just 160 feet within two to three years.

**WHY REPLACE BULBS TWO AT A TIME** - In an effort to promote the importance of changing headlight bulbs two at a time, Philips developed the "Change In Pairs" safety campaign, which aims to educate motorists about the dangers of dimming lights while promoting the many reasons that changing bulbs in pairs makes the road safer for all travelers. To support this safety initiative, Philips also packages its Upgrade Headlight Bulbs in pairs.

Though replacing two headlight bulbs when only one is dimming may seem unwarranted, maintaining a consistent light output in both headlights makes the road safer for drivers, their passengers and oncoming motorists. When only one bulb is replaced, the resulting light output can be both unbalanced and unpredictable, providing inadequate lighting that can compromise driver visibility. In addition, oncoming motorists may experience difficulty seeing vehicles with just one headlight operating at full capacity, and some may even mistake oncoming cars and trucks for motorcycles, creating positioning issues for drivers on both sides of the yellow line.

**HOW ELSE CAN DRIVERS IMPROVE VISIBILITY?** - In addition to replacing headlight bulbs in pairs every two to three years, drivers can take the following proactive measures to reduce the likelihood that their vision will be compromised while on the road.

- Replace worn out wiper blades. Wiper blades need to be changed each season or in three-month intervals. Rubber wiper blades can grow brittle rather quickly, potentially compromising driver visibility at times when they need their vision to be as strong as possible, such as when rain or snow is falling.
- Clean interior glass and mirrors. Over time, interior glass can develop a film-like buildup that reduces vision and creates hazy reflections from the sun. Smokers may notice such buildup is especially thick in their vehicles. Periodically clean interior glass and mirrors to prevent this film from compromising your vision.
- Don't hang accessories in your vehicle. Fuzzy dice, photos and other items hung on rearview mirrors can prove distracting and block you from seeing the road.

### Vehicle Maintenance Tasks Drivers Don't Want To Overlook

Savvy drivers recognize that maintenance is essential to keeping their vehicles running strong for years on end. Such maintenance ensures vehicles are safe to take out on the road, and basic upkeep also protects drivers' financial investments in their cars and trucks. Drivers who are not mechanically inclined tend to put their vehicles in the hands of a trusted mechanic to perform routine maintenance like oil changes. But there's a host of simpler vehicle maintenance tasks that drivers don't want to overlook, some of which can be performed without visiting the auto body shop.

- **Brake inspections:** Brake inspections are best left to the professionals, who can check the thickness of brake pads and look for other indicators of excessive wear. The automotive resource Cars.com recommends having brakes inspected during routine tire rotations, which many automotive professionals suggest should be done every six months.
- **Car wash:** Car washes might not be the first task drivers associate with vehicle maintenance, but they can prevent long-term damage to cars and trucks. Damage from bird droppings and road salt and ice melt products in the winter can damage a vehicle's paint job and its undercarriage. Wash the car on your own at home or visit a professional car wash to perform this simple yet vital maintenance at regular intervals and whenever you notice significant buildup of dirt and grime on the car's exterior.
- **Air filter:** The air filter on a car or truck prevents debris, dirt and other contaminants from getting into the engine. The auto insurance experts at Allstate® advise drivers to inspect their vehicle air filters once a year. Air filters in need of replacement may appear dirty, and reduced fuel economy, unusual engine sounds and reduced horsepower are some other potential indicators that an air filter needs to be replaced.
- **Windshield wipers:** Windshield wiper blades are easily overlooked, but various automotive experts recommend replacing wiper blades every six to 12 months. Old wiper blades won't perform at peak capacity, dramatically reducing visibility during heavy rain and snowstorms. Anyone can replace their own windshield wiper blades in a matter of minutes, and new blades won't break the bank. Vehicle maintenance is not exclusive to tending to what's under the hood. Keeping a car running smoothly for years involves routine tasks that many drivers can perform without professional assistance.

### Why Is Tire Rotation So Important?

Vehicle owners need to keep maintenance on the mind to ensure their cars and trucks are operating at peak capacity. Various components should be checked and serviced at key intervals. Oil changes and fluid top-offs are part of routine maintenance, but it can be easy to forget about other important parts of the vehicle, including tires. Rotating tires is vital to their upkeep. Bridgestone Tires advises that tire rotation involves routinely repositioning a vehicle's tires in specific patterns from front to back and side to side. According to Big O Tires, the front tires tend to wear on the outside edges because the tire leans over when a driver turns a corner. The rear tires just follow the front ones, so they usually wear more evenly. By leaving tires in place, the outside edges on the front tires will wear down much faster than the rest and those tires will need to be replaced sooner. Rotation may be required by tire warranties. Rotation also keeps the tires working properly. Experts generally advise tire rotation every 6,000 to 8,000 miles, even if they do not show any signs of wear. It is challenging to determine if weather treads are uneven or how much wear has been sustained just by looking at them. Rotating tires can prolong the life of tires and decrease how frequently they need to be replaced. Rotating tires keeps the tread depth uniform and helps maintain traction and consistent handling across all four tires. Bridgestone says the tire rotation pattern that is best for a particular vehicle depends on the type of tire being used. Patterns are recommended by the standardizing body of the tire industry, called The Tire and Rim Association, Inc. Individuals can consult with professional mechanics about the proper way to rotate tires. Many tire manufacturers or automotive stores that have sold customers tires also will do tire rotations, some free of charge.

In addition to proper traction, minimizing uneven tire treads causes the vehicle to be more balanced, advises Wrench, a mobile auto repair and maintenance company. This enables the driver to have more control even when roads are slippery. Many auto service centers will then align and balance tires after they have been rotated. At this time the mechanic will likely check brakes as well, since it is easy to see and reach them when the tires are off. Tire rotation is an important component of vehicle maintenance. Check with a qualified automotive professional to see if it's time to have your vehicle's tires rotated.
