Many church people think their protestant preacher is teaching the word of God, but cannot prove it by The Bible and history. Doctrines to keep holy: Sunday (Baal), ash (mark) Wednesday (god mercury), Lent is the preparation for mother goddess, and Easter (Ishtar to Eostre), all pagan festivals (the great apostasy), doctrines of the RCC, not of Christ! It was given to the beast to think to change times and laws (Dan 7:25)! Christ was manifested to destroy the works of the devil (1Jn 3:1-10) and to keep the law (Mt 5:17-19)! Reprobate minds (Rom 1:18-32) cannot believe in The Word written by the prophet Moses (Ex 34:27) to keep Holy The Sabbaths, New Moons, Passover, Feast of unleavened bread, Feast of weeks (Pentecost), blowing of trumpets, The Day of Atonement, Feast of Tabernacles! Nor do they hear the Prophet, Priest and King Messiah (Mt 5:17-19, Jn 5:46-47, 14:15, 24, by not hearing (Acts 3:23)!

Researchers publishing in Cell Metabolism have discovered that mirabegron (trade name Myrbetriq), a drug FDA-approved to treat overactive bladder, may boost brown fat's metabolic powers, making it a promising candidate for combatting obesity. Unlike energy-storing white fat, brown fat burns energy to generate heat, which can help maintain body weight and prevent obesity.

Patients who experienced a certain type of heart attack who received the anticoagulant fondaparinux (trade name Arixtra) had a lower risk of major bleeding events and death both in the hospital and after six months compared to patients who received low-molecular-weight heparin (LMWH), although both groups had similar rates of subsequent heart attack or stroke, according to a study in JAMA.

The U.S. Food and Drug Administration has granted approval to Lenvima (lenvatinib) to treat patients with progressive, differentiated thyroid cancer (DTC) whose disease progressed despite receiving radioactive iodine therapy (radioactive iodine refractory disease). The most common type of thyroid cancer, DTC is a cancerous growth of the thyroid gland, which is located in the neck and helps regulate the body's metabolism. The National Cancer Institute estimates that 62,980 Americans were diagnosed with thyroid cancer and 1,890 died from the disease in 2014. Lenvima is a kinase inhibitor, which works by blocking certain proteins from helping cancer cells grow and divide.
