Antler Arms
215 S. Antler • Gladwin

Maple Manor
130 W. Maple • Gladwin

Beaverton Manor
110 Knox • Beaverton

"It's been nearly 15 years now that I've lived here at Antler Arms. Playing dominos, cards and puzzling are some of my hobbies I enjoy doing in one of the lounges. Having a nice hot meal at noon in the dining room is great. Its also a good time to chat with friends and neighbors. So I would recommend Antler Arms to anyone." *Barbara Augustine*

Fall Home and Garden

Tips for Early Fall Home Maintenance

1. Furnace Repair

You don't want to wait until the cold winter months to turn on your furnace and find that it isn't working. That's why early fall is the best time to schedule your furnace repair. This off-peak time often costs less than it will in January, and gives you plenty of flexibility to schedule the technician at your convenience. Waiting until winter to tackle this project will mean you pay a higher rate in labor fees, and you risk your furnace breaking down when you need it the most.

2. Install a Portable Generator

If you live in an area that sees severe weather during the fall and winter months, you may want to invest in a portable generator to help keep your home running in case of a power outage. Portable generators come in many sizes so you can find the right fit for your home. Install one in early fall before costs go up during the colder months, and ensure that you're ready for the first outage of the year. Once the snow begins to fly, you can expect the demand for generators to go through the roof driving up prices and limiting availability. Waiting too long could mean that you run the risk of not finding one at a reasonable price or that you need to go without power in the event of a storm.

3. Install Gutter Guards

During the autumn months, leaves and pine needles drop from trees at a very fast rate. These can collect in your gutter, clogging them up and forcing water back onto your roof. A gutter guard can help prevent this by stopping the debris from entering your gutters. Take care of this issue in early fall when it isn't too hot to work on your gutters, but before the leaves start falling to get the best results. Wait too long and you may have to pay a higher cost in labor due to demand and the fact that your gutters will need to be cleaned prior to installation.

Have An Ugly Stump?

Our state of the art stump grinders can turn those ugly tree stumps to a pile of sawdust without damaging your yard.

Fall Gardening Tips

- 1. Leave some leaves**
Hooray! You don't have to rake all the leaves! It's OK not to rake up leaves under trees and shrubs and on sturdy ground covers (over time they become much-needed compost). However, must-rake leaves are those on perennial beds (they can cause crown rot) and grass lawns (they attract fungi and insects).
- 2. Protect perennials**
As perennials fade away, mark their locations with small sticks, so you don't lose them in the spring. If you haven't brought in your house plants, do it before you turn on your heat to give them time to adjust, and wash them first to get rid of pests.
- 3. Transplant fruit plants**
Rhubarb, raspberries and strawberries can quickly deplete the soil of nutrients, so find new locations for them every three or four years. Transplant them well before the first light frost so they can develop roots.
- 4. House the herbs**
Dig up your herbs to grow inside. Keep them in a cool, sunny spot, and let the soil dry out before watering. Snip leaves whenever you need herbs in your cooking, but don't strip completely. For herbs that have grown prolifically, cut them back halfway and dry or freeze the extra, or share it with friends.
- 5. Hang the tomatoes**
If you have unripe tomatoes still hanging on the vine, and frost is fast approaching, pull the vines out by the roots and hang them upside down in a cool, dark place to finish ripening.
- 6. Bring on the bulbs**
Fall is "now or never" time to plant spring bulbs. Shop early for the best selection, and don't delay too much in planting them after buying. You'll want to plant them 6-8 weeks before the first hard frost in your area.
- 7. Try new (tasty) trees**
Fall is the best season to plant fruit trees such as apples, pears, plums, cherries, peaches, apricots and figs. Young trees should be staked to prevent roots from being pulled by fall and winter winds.

Fall Home and Garden

Tips to Make Your Home Look Fresh This Fall

A freshly painted front door helps your home look better, and it can be finished in less than a day. Fall is usually the perfect time for this activity. Exterior painting should be done at a time when the temps are at least 50 degrees or so and aren't dipping below the 40s at night. This allows the paint to adhere properly and prevents it from freezing before it is fully dry.

Check the deck. If the wood is splintering, the finish faded, or the rails shaky, now's the time to repair or replace it.

A new roof can be basic or with details that enhance curb appeal, but the main idea is to protect your home. Have it checked by a professional to see what problems or potential problems there are.

One thing you can do to spruce up your home is to have it power washed. It's best to have a professional do this as they know how to do it without causing any damage.

New windows might be a great way to update your home and decrease your energy bills.

Have any dead or falling trees taken care now of by an insured professional before winter snows cause more problems.
