*Thank You*

from **KENYA RELIEF.ORG**

During the holiday season more than ever, our thoughts turn gratefully to those who have supported us for the last 14 years and have helped make our vision a reality. With your help, we now support over 140 orphans, a school with over 450 students and a medical center that treats hundreds of patients each year. We sincerely say thank you.

We also ask that your continue your support for the future by making your year-end donation by December 31. Your contribution can provide food, shelter, medicine and most importantly, hope for the those in need.

The Holy Bible Exemplifies The Holy Father's Word, to which many so called Christian churches deny. They'll praise Christ, reject the law and try to use The Bible to teach their doctrines are Christ given, then cannot give one Bible reference where Christ condemned even one jot or tittle of His Holy Father's law (Mt 5:17-19)! They call themselves Christian churches (followers of Christ), then what Christ commanded they'll reject, and teach history revealed paganism by apostasy as The Bible truth (Dan 7:25, Jn 5: 40-42, 14:6, Rom 1:17-32)! John Knox (1559) preached a stirring sermon against the "idolatry" of the Catholic ritual of the mass, unfortunately most Protestant churches kept much of the apostasy as The Holy Truth! So Be It!

The class of antidepressants known as SSRIs (selective serotonin reuptake inhibitors), taken to curb menopausal symptoms, may boost bone fracture risk, suggests, research published online in the journal Injury Prevention. The heightened risk seems to last for several years, the findings show, prompting the researchers to suggest that shorter treatment length may be preferable. Further studies are warranted to see if the same association is found at lower doses of these drugs, the say.

\*\*\*

About half of all breast cancer patients could benefit from having the cheap and widely-available female hormone progesterone added to their treatment, according to research published in Nature.

\*\*\*

FDA is strengthening an existing warning in prescription drug labels and over-the-counter (OTC) Drug Facts labels to indicate that nonsteroidal anti-inflammatory drugs (NSAIDs) can increase the chance of a heart attack or stroke, either of which can lead to death. Those serious side effects can occur as early as the first few weeks of using an NSAID, and the risk might rise the longer people take NSAIDs. (Although aspirin is also an NSAID, this revised warning doesn't apply to aspirin.) The OTC drugs in this group are used for the temporary relief of pain and fever. The prescription drugs in this group are used to treat several kinds of arthritis and other painful conditions. Because many prescription and OTC medicines contain NSAIDs, consumers should avoid taking multiple remedies with the same active ingredient.
