The Biblical law (commandments) is The Holy Father Elohim's Word and made flesh (Jn 1:1-17, 14:6, 15, 24). If you love The Holy Messiah (The Only Begotten Holy Son), there is no debate for you have overcome Satan's ministers (2Cor 11:13-15) that tempt mankind not to love Father Elohim's Holy Law. Why? He that committeth sin is of the devil, by transgressing the law a sinner is of the devil. This Holy Word (Christ) was sent into the world (Jn 3:3-21) to defeat the devil (1Jn 3:4-10) and He said sin no more (Jn 5:14,8:11) forgiving past sin (Rom 3:25), not willful sin (Heb 10:26-31). Whosoever trust in Christ defeats the devil for He is The Holy Truth, if you do not believe The Word (Mt 4:4, 5:17-19, 7:21-23, Lk 4:4,16:17, Heb13:8), then you believe in a liar, the devil! Whosoever teach mankind cannot live as Christ saith, is a minister for Satan (Mt 16:23, Mk 8:33). So Be It!

There is conflicting evidence about whether digoxin, a drug that has been used worldwide for centuries to treat heart disease, might contribute to an increase in deaths in patients with atrial fibrillation(AF) or congestive heart failure (CHF). Now, the largest review of all the evidence to date, published in the European Heart Journal, shows that it is associated with an increased risk of death in these patients, particularly in those being treated for AF.

The U.S. Food and Drug Administration has approved Viekira Pak (ombitasvir, paritaprevir and ritonavir tablets co-packaged with dasabuvir tablets) to treat patients with chronic hepatitis C virus (HCV) genotype 1 infection, including those with a type of advanced liver disease called cirrhosis. Hepatitis C is a viral disease that causes inflammation of the liver that can lead to reduced liver function, liver failure or liver cancer. Most people infected with HCV have no symptoms of the disease until liver damage becomes apparent, which may take decades. According to the Centers for Disease Control and Prevention, about 3.2 million Americans are infected with HCV, and without proper treatment, 15-30 percent of these people will go on to develop cirrhosis.

The U.S. Food and Drug Administration has granted accelerated approval to Lynparza (olaparib), a new drug treatment for women with advanced ovarian cancer associated with defective BRCA genes, as detected by an FDA-approved test. Ovarian cancer forms in the ovary, one of a pair of female reproductive glands where ova, or eggs, are formed. The National Cancer Institute estimates that 21,980 American women will be diagnosed with and 14,270 will die from ovarian cancer in 2014.
