Just maybe some Bible toting scripture quoting God fearing so called Christian minister can give, by The Bible, why some of the Bible is denied? "Example of a few" (Mt 4:4, 5:17-19, 7:21-23, 28:20, Lk 4:4, 6:46, Rev 22:15, 18-19)! Why is your Easter servitude established by man not The Holy Bible? The Holy Father plainly by The Holy Bible gave the exact day even to the hour for His children to observe The Sabbath, Passover, Feast of unleavened bread, Pentecost, Feast of trumpet, Day of Atonement and Feast of tabernacles! Since The Holy Father, The Holy Son and Holy Ghost are one (Jn 10:30, 14:9-11, 1Jn 5:7), then to nullify the Holy Biblical Days is seeking to divide The Holy Father's House (Mt 12:25) by bringing history proven pagan days (Mt 15:9) into thy church worship (apostasy)! So be it! Ron

The U.S. Food and Drug Administration has approved Vraylar (cariprazine) capsules to treat schizophrenia and bipolar disorder in adults. Schizophrenia is a chronic, severe and disabling brain disorder affecting about one percent of Americans. Typically, symptoms are first seen in adults younger than 30 years of age and include hearing voices or seeing things that are not there, believing other people are reading their minds or controlling their thoughts, and being suspicious or withdrawn. Bipolar disorder, also known as manic depressive illness, is another brain disorder that causes unusual shifts in mood, energy, activity levels and the ability to carry out day-to-day tasks. The symptoms of bipolar disorder include alternating periods of depression and high, irritable mood, increased activity and restlessness, racing thoughts, talking fast, impulsive behavior and a decreased need for sleep.

In a surprising new finding, heart attack patients treated with a substantially lower dosage of beta-blockers than used in earlier clinical trials showing their effectiveness survived at the same rate, or even better, than patients on the higher doses used in those trials. In fact, patients who received one-fourth of the original clinical trial dose had up to a 25 percent decrease in mortality compared to the full dose group. About 90 percent of patients who have had a heart attack currently receive beta-blockers, a class of drug commonly prescribed to improve survival and prevent future heart attacks. Beta-blockers block the effects of adrenaline on the heart, reduce irregular heartbeats (arrhythmia) and help prevent heart failure. The study was published in the Journal of the American College of Cardiology.

## Snoring Isn't Pretty...

BUT NEITHER IS A CPAP!

If you can't wear your CPAP because of its bulkiness or discomfort, it's not helping your sleep apnea. Dr Timothy Smith offers a comfortable and convenient alternative: a custom designed oral appliance to move the jaw forward and open the airway. Many of our patients report feeling better and more rested than they have in years. Call us at (256) 287-1250 about a sleep apnea consultation today.
