READER'S **Recipe**

CEYLON CHICKEN CURRY & RICE NOODLE SOUP

- | | |
|---|-------------------------------------|
| 6 oz. uncooked wide rice noodles | 1/4 tsp. cayenne pepper |
| 3 Tbsp. ghee or olive oil, divided | 2 anchovy fillets, minced, optional |
| 1 lb. boneless chicken breasts, thinly sliced and cut into 1/2-in. pieces | 2 Tbsp. white wine vinegar |
| 1 medium onion, chopped | 1 carton (32 oz.) chicken broth |
| 2/3 cup sliced fresh carrots | 1 can (13.66 oz. coconut milk |
| 3 bay leaves | 2 Tbsp. jaggery or dark brown sugar |
| 2 Tbsp. minced fresh gingerroot | 1-1/2 cups chopped fresh kale |
| 1 stalk lemongrass | 1/2 cup cherry tomatoes, halved |
| 1 whole star anise | |
| 1 Tbsp. curry powder | |
| 2 tsp. ground turmeric | |
| 1 garlic clove, minced | |
| 1/2 tsp. salt | |

Cook the noodles according to package directions for al dente. In a Dutch oven, heat 1 Tbsp. ghee over medium-high heat. Add the chicken; cook and stir until no longer pink, 4-5 minutes. Remove from pan.
Cook and stir the onion and carrots in remaining 2 Tbsp. ghee until tender, 12-15 minutes. Add the bay leaves, ginger, lemongrass, star anise, curry powder, turmeric, garlic, salt, cayenne pepper and, if desired, anchovies; cook 1 minute longer.
Add vinegar to the pan; cook for 30 seconds, stirring to loosen browned bits from pan. Add broth, coconut milk and jaggery. Bring to a boil; reduce heat. Add kale and tomatoes; simmer until tender, 6-8 minutes.
Remove and discard bay leaves, lemongrass and star anise. Drain noodles; stir into soup. Add chicken; heat through.

5 Ways To Make Homes Safer

Injuries that occur around the home contribute to millions of medical visits and tens of thousands of fatalities each year. Falls account for the largest percentage of home accidents, with the U.S. Centers for Disease Control and Prevention reporting that around 30,000 fall-related fatalities occur each year in the United States. Many home accidents are entirely preventable when proper caution is exercised.

As homeowners prepare for home-improvement projects, improving safety inside and outside the home should be a priority.

1. **IMPROVE LIGHTING** - One of the easiest ways to reduce the risk of falls is to improve lighting around the home. The National Institutes of Health state that adequate lighting is important at entrances to the home, stairways, hallways, and other frequently traversed areas. Make sure lighting fixtures are using the highest wattage light bulb allowed. Artificial lighting sources become even more vital in fall and autumn, when natural light is less abundant in a home. In addition, install lighting outdoors by the front door, over the garage and where garbage pails are stored to facilitate safe passage.

2. **ELIMINATE SLICK SURFACES** - Improving traction around the house also can minimize falls. Throw rugs and runners can be made more secure with nonslip rubber backings. Bath rugs can reduce slipping on wet surfaces in the bathroom. Also, nonslip mats can be used inside of showers and bathtubs.

Use shoe trays to reduce puddling from melting snow or rain runoff in entryways. Mop up spills quickly, and consider the use of matte- or textured-finished flooring to improve stability underfoot.

Promptly remove snow and ice from driveways and walkways. For those who live in cold climates, heated concrete can help melt precipitation before it accumulates.

3. **MAKE NEEDED REPAIRS** - Repair loose floorboards and pull carpet taut if it has started to stretch out. Address cracks outdoors and ensure that patio stones, bricks and pavers are secure and level to reduce tripping hazards. Fix areas of the landscape where water may pool and freeze, creating potential hazards.

4. **DECLUTTER ALL SPACES** - Remove unnecessary items and furniture from rooms to free up more space to get around. Be sure there are no obstructions in walkways, entryways and near doors. Keep staircases clear at all times.

5. **INVEST IN ASSISTIVE DEVICES** - Handrails, grab bars, nonslip stair treads, and many other devices can make homes safer for people of all ages and abilities. Outfit cabinets and closets with organizers that put frequently used items within easy reach. A sturdy step stool can reduce the risk of injury while reaching for items stored on high shelves.

Taking measures to reduce the risk of falling around the home is a worthwhile home improvement project.

Make Homes Safer For Pets

Pets require certain comforts to live long and healthy lives. In addition to adequate nutrition, exercise, medical care, and mental stimulation, pets need a safe place to live.

The average home is filled with various items that can be harmful to pets. Just as parents baby-proof their homes when welcoming new children into their families, pet owners can take inventory of potential hazards to pets and take steps to safeguard their pets from home-related injuries. According to the American Veterinary Medical Association, a few simple adjustments around the house can prevent many pet emergencies.

- Invest in cabinet locks. Cats and dogs can be curious animals, gaining access to areas of a home pet owners never would have imagined possible. If you can't store everything beyond pets' reach, then use cabinet and drawer latches to prevent access to areas that are off limits. Lock doors to basements, garages and storage sheds as well.

- Cover all garbage cans. Animals have extraordinary senses of smell, and they may be attracted to trash cans around the house. Pets rooting around in the garbage can be messy, but this can also make pets vulnerable to illness. Invest in garbage cans with locks or tight lids to prevent food poisoning or choking.

- Use medications wisely. Be mindful of medications, making sure none of your pills fall on the floor where they can be gobbled up by pets.

- Protect belongings. Cats can scale many objects in the house, gaining access to areas of the house that dogs cannot reach. Cats also can

be attracted to small shiny objects, such as jewelry or glass items, that are choking hazards. Store potential choking hazards out of sight of curious cats.

- Clean the furnace. Allergens and poor indoor air quality is not just a concern for humans. Pets also can be affected by allergies and health issues that result from exposure to mold or dirt in a home. Have your HVAC system routinely serviced and routinely change indoor air filters to maintain healthy air quality. When possible, open windows to let fresh air inside.

- Secure windows and doors. Cats and dogs may be distracted by something outdoors and feel compelled to chase after it. Dogs and cats can suffer serious injuries if they fall from windows. Make sure window screens are secure and install guards if your pet likes to hang out by the windows. Exercise caution when entering and leaving your home so pets don't scurry outside.

- Keep cords and electronic outlets secure. Teething puppies or curious cats may bite or pull on power cords. Use cord keepers to cover up electric lines and outlet locks to keep plugs where they should be.

- Provide a comfortable indoor climate. Many pets spend the majority of their days indoors where climate and temperature can be controlled. However, if yours is an outside pet or requires a brief stint in the garage or an uninsulated area, make sure the temperature in such areas is comfortable and safe.

Take precautions around the house to keep pets safe, comfortable and secure.

BENEFITS OF A PREARRANGED FUNERAL PLAN

Affords you the freedom to choose exactly how your life will be remembered.

Your family is relieved of the emotional burden associated with the funeral arrangement decisions.

This is accomplished by reducing family stress, anxiety, confusion, uncertainty, possible conflict and/or misunderstandings about your final wishes among immediate family members or "blended" family members.

It relieves your family of the financial strain associated with paying for final expenses.

Funeral expenses can be made Medicaid/SSEI exempt, thus protecting assets from confiscation due to unforeseen nursing home or long-term care expenses.

Conditions That Fall Under The Umbrella of COPD

Despite its prevalence, COPD might not be on a person's radar until they or someone they love is diagnosed with this disease of the lungs. But understanding COPD, which is an umbrella term that describes various progressive lung diseases, can help people lower their risk and potentially identify symptoms and seek treatment.

WHAT IS COPD?
 The COPD Foundation notes that COPD is characterized by increasing breathlessness. The disease is currently incurable. However, treatment can help people effectively manage their COPD and breathe better. In fact, many people with COPD live for many years and continue to enjoy life after diagnosis.

WHAT CONDITIONS FALL UNDER THE UMBRELLA OF COPD? Emphysema, chronic bronchitis and refractory (non-reverse) asthma are three conditions that fall under the umbrella of COPD.

• **Emphysema:** Damage to the alveoli, which are tiny air sacs in the lungs, causes emphysema. When this damage occurs, the walls inside the alveoli disappear, turning the small sacs into large sacs. The resulting larger sacs cannot absorb oxygen as effectively as the small sacs, so less oxygen is then absorbed into the blood. In addition, the lungs become stretched out and lose their springiness when the alveoli are damaged. The airways become flabby, trapping air in the lungs and creating feelings of shortness of breath.

• **CHRONIC BRONCHITIS:** Chronic bronchitis is caused when the bronchial tubes are irritated and become swollen. That damage causes coughing and shortness of breath. Bronchitis becomes chronic bronchitis when mucus comes up with the cough and the cough lasts for at least three months for two years in a row. The COPD Foundation also notes that, in healthy lungs, tiny hairs known as cilia help move mucus up the tubes of the lungs so it can be coughed out. When a person has chronic bronchitis, the tubes have lost their cilia, leading to more coughing and irritating the lungs even further and creating more mucus. The tubes of the lungs then swell, making it hard to breathe.

• **REFRACTORY (non-reversible) ASTHMA:** During a typical asthma attack, bronchial airways tighten up and swell. Asthma medications can typically reverse this. However, refractory asthma does not respond to medication, leaving sufferers with tight, swollen airways. Increased shortness of breath; frequent coughing, with and without mucus; increased breathlessness; wheezing; and tightness in the chest are some common symptoms of COPD. Not all cases of COPD are the same, and people who feel any of the aforementioned symptoms should report them to their physicians immediately. Learn more at www.copdfoundation.org.
