Healthy Hand Hygiene Habits

Protect yourself against COVID-19 and other diarrheal and respiratory illnesses, and help prevent the spread of germs to others, by following these simple hand hygiene guidelines:

1. Wash your hands with soap and warm water, lathering for at least 20 seconds.
2. If soap is unavailable, use a hand sanitizer containing at least 60 percent alcohol to clean your hands.

Wash your hands throughout the day, and particularly under these circumstances:

- Before preparing food
- Before eating
- After using the toilet
- After changing a diaper or helping a child use the toilet
- Before and after exposure to someone who is sick
- After coughing, sneezing or blowing your nose
- After touching an animal or picking up animal waste
- After handling pet food or treats
- After handling garbage or garbage cans
- Before and after attending to a cut or wound

Proper handwashing helps all of us stay healthy, so remember to be aware and do your part to help protect yourself and others!

2. Avoid touching your eyes, nose and mouth with unwashed hands.
3. Cover your cough or sneeze with a tissue, then dispose of the tissue in the trash.
4. Stay at home as much as possible, and always when sick until your symptoms are gone.

Face Mask FAQ

Should I be wearing a face mask?

YES

The CDC recommends wearing cloth face coverings in public settings. Face coverings can be fashioned from household items to cover the mouth and nose, and should be machine washed regularly. Surgical masks or N-95 respirators should be reserved for healthcare workers and medical first responders.

Testing Guidelines

If you feel sick with fever, cough or difficulty breathing, contact your doctor or local health department to help determine if you should be tested for COVID-19. People experiencing severe breathing problems should seek immediate medical attention.
