FRUIT TREE INFO

These fruit trees were chosen for our climate because of hardiness. When they arrive they will be approximately 5/8" in diameter and 5-6' tall with lateral branches. They are expected to produce fruit in 2-4 years. They will grow best in full sun and in loamy, well drained soil. Many fruit tree varieties are not self-pollinating, it may be necessary to plant 2 different varieties of tree. Call our office at 989-772-5927 Ext. 3 for more info.

Salute to Agriculture

National Agriculture Day March 22, 2022

On National Agriculture Day and during National Agriculture Week, we celebrate our ag industry and the hardworking men and women driving its success. Agriculture plays a key role in our nation's economy and prosperity, from its roots in food production and distribution to the influence that stems from it into countless sectors here at home and around the world.

Thanks to the skill, dedication and innovation of our nation's farmers and ranchers, we enjoy one of the world's most affordable, accessible and abundant food supplies. The fruits of their labor directly impact the health and well-being of our families and communities, and we greatly appreciate everything they bring to the table.

To the agricultural producers here in our community and all around the country,
Thank You, and Happy Ag Day!
