today's electric heat pumps are the right choice

- Year-round heating & cooling
- Better indoor air quality
- Safety
- Reduced carbon emissions
- Fast and even home heating

Heat pumps run on electricity and are far more efficient than other heat sources. The cost to heat with a heat pump is lower than fuel oil, propane or electric baseboard.

Depending on electric and gas rates, the cost of heating with a cold-climate air-source heat pump can be even less than natural gas.

We offer a rebate up to \$1,300 to make the switch even more affordable!

Insulation is the "not-so-glamorous" side of a building or remodel project... definitely not as much fun as new granite counter tops or a tile shower! In fact, the best insulation will go un-noticed if it is done right- it keeps you comfortable and extra money in your pocket from lower energy bills.

BUT "cheap" or poorly installed insulation will constantly remind you

that something is wrong, usually with drafts and cold spots and can lead to high heat and cooling bills. Bad insulation can also lower the life expectancy of your home or other building!

Insulate your building right the first time! Four Way Insulation offers affordable, technologically advanced insulation options for your home, shop, ag building, or commercial project that will protect your investment and keep you comfortable. Our staff has the knowlege to take care of all the details and get the job done right. Give Pat a call for a free estimate!
