THE LAW AND YOU

BY NATHAN D. PACE
ATTORNEY AT LAW

YOU'VE GOT BAIL

In the legal system, "bail" is used to obtain release of a defendant from the court's custody by depositing funds, assets, or secured bonds as security to ensure compliance and attendance at future legal proceedings where their presence is mandatory. Bail is a conditional release that may also include court imposed restrictions and conditions on the defendant to prevent inappropriate interference with the judicial process. Bail may be tendered in the form of a property or corporate surety bond, cash, or personal recognizance. Once the legal process concludes, bond is returned to the defendant or parties who provided the bail. Violation of the terms of bail results in revocation of bail and defendants are remanded into custody until trial.

The Supreme Court has ruled that the U.S. Constitution permits holding a defendant without bail in some circumstances. In other words, while bail is a Constitutional right, it is not an absolute right. When bail is too high for a defendant to pay, the defendant may use the services of a "bail bondsman." This is a third party that agrees to be responsible for the debt owed to the court. To schedule a consultation, please call the Law Office of MACK & PACE.

(585) 798-1000

534 Main St., Suite 6
Medina, NY 14103

P.S. A variety of factors are considered by a judge when setting bail, including the risk of the defendant fleeing, the severity of the offense, and the prior criminal record of the defendant.

"The Right Lawyer Matters."

New Mommy and Me Program helps New Mothers with Postpartum Depression

By Erika Pozzuolo, LMHC, PMH-C, Maternal/ Child Health Lead Therapist, Oak Orchard Health, a community health center with 11 locations in the region

You have given birth to your baby, what an exciting time! It can also be an overwhelming time with the middle-of-the-night feedings, sleep deprivation, and maybe there are more children to care for. Wow!

If you can think of seven women you know who have had a baby-- statistics suggest that at least one of those women experienced postpartum depression or anxiety (Postpartum Support International)! This is only part of the reason that this year Oak Orchard Health launched our new Mommy and Me program in all locations. This program is an extremely innovative approach to improve child health outcomes in our region, and not only that but to also improve maternal health outcomes, with special attention to mental health in the postpartum period.

This support through the Mommy and Me Program extends to guardians of pediatric patients under the age of 5 at Oak Orchard Health. Patients now, as standard practice, will be met by a care manager in several of their child's well visits, from birth to age 4 1/2. Through some questions and interviewing, we can identify and help address any needs the family may have. Care managers will be evaluating for postpartum depression and anxiety, and then refer patients to one of our behavioral health counselors specializing in perinatal mental health.

You now have a care manager on your medical team

These care managers will also be helping to track children's vaccination due dates, referrals for the first dental visit, and more. We will help fill in the gaps financially by referring to WIC (a supplemental nutrition program for Women, Infants, and Children), as well as maintaining a diaper bank to help supplement families struggling with the cost of diapers. This initiative also includes an early literacy program, where pediatricians will be providing age-appropriate books at well visits and education for parents on how to best help their child develop literacy and language.

Why this new program?
The initial idea for Mommy and Me came from

our Medical Director and Pediatrician, Dr. Danielle Renodin-Mead. She brought to our attention that the U.S. has some of the poorest health outcomes for children and their birth mothers. Just one large contributing factor to this is our cultures' approach to postpartum mental health, as well as the stigma that often surrounds this. That stigma is a barrier to mothers seeking the necessary care they need. Most people may have some awareness of "the baby blues," a very commonly experienced emotional expression of hormonal shifts that take place following the birth of a baby and lasts up to about two weeks postpartum.

There are, however, many new moms who present as more serious than typical "baby blues." That often means it lasts longer and can be very debilitating. If left unidentified or untreated, these mood or anxiety disorders can have a significant impact on family, sleep, ability to breastfeed, and overall wellness, negatively impacting both Mom and baby. Fathers also commonly experience anxiety and depression. We also will be paying special attention to other guardians, like grandparents or adoptive parents taking in babies.

The Mommy and Me Program at Oak Orchard Health

Part of our team's mission for the Mommy and Me Program is to break down the barriers to treating postpartum mood and anxiety disorders, such as depression, anxiety, panic disorder, obsessive-compulsive disorder, post-traumatic stress disorder, and psychosis. We want to send the message that these things are somewhat common and very treatable. Oftentimes we already have risk factors prior to pregnancy, that can make us more likely to develop a postpartum mood disorder.

Oak Orchard Health's Mommy and Me program is also here to support women and families who are experiencing infertility, infant loss, or birth traumas, through counseling support. It's been my experience that a great deal of shame weighs on women who experience postpartum depression, intrusive thoughts, and intense anxiety, after bringing their baby home. However, when given the right information and platform to share, so many women can identify with these experiences. The more we open up the conversation about postpartum mental health, the more women and families can possibly prepare, or recognize the signs, and seek support earlier.

Coincidentally, most of our providers involved with Mommy and Me are also women, and mothers themselves, passionate about supporting the women of our communities and seeing families thrive. We have been so excited to see this program come to life, set an example of support, bring awareness, and maybe even inspire other similar programs to be developed elsewhere.

SIGNS OF A STROKE

Sometimes symptoms of a stroke are difficult to identify. The stroke victim may suffer severe brain damage when people nearby fail to recognize the symptoms of a stroke. Now doctors say a bystander can recognize a stroke by asking a few simple questions:

- 1 Ask the person to **SMILE**.
- 2 Ask the person to **TALK AND SPEAK A SIMPLE SENTENCE**. i.e. It is sunny out today.
- 3 Ask the person to **RAISE BOTH ARMS**.
- 4 Ask the person to **STICK OUT HIS TONGUE**. If the tongue goes to one side or the other, that is a sign of a stroke.

OTHER STROKE WARNING SIGNS

- Sudden **numbness or weakness** of the face, arm or leg, especially on one side of the body
- Sudden **confusion**, trouble speaking or understanding
- Sudden **trouble seeing** in one or both eyes
- Sudden **trouble walking, dizziness**, loss of balance or coordination
- Sudden, **severe headache** with no known cause

If you or someone with you has one or more of these signs, don't delay!

Do you have HEEL pain or ARCH pain?

HEEL SPUR SYNDROME/PLANTAR FASCITIS is a common problem among people who are active. It starts as a dull intermittent pain in the heel which may progress to a sharp persistent pain. Classically, it is worse in the morning with the first few steps, after sitting, after standing, or after walking.

- Plantar fasciitis often begins with irritation and tearing of the fibrous band of tissue on the bottom of the foot, which may eventually result in the formation of a heel spur.

- Contributing factors: flat pronated feet, high arched feet, poor shoe support, increased age, sudden weight increase, increased activity level, family tendency.

- Approximately 2-3 times your body weight of force is exerted on each foot with walking. Flexible, non-custom molded arch support found at those advertised shoe stores cannot support these forces and usually do not provide long-lasting relief, do not come with a lifetime warranty, and are typically more expensive than custom-molded ones made by our office.

- 95 percent of our patients symptoms are resolved with conservative treatment, avoiding surgical intervention.

- We also offer surgical procedures with the best post-op success rates using Endoscopic Plantar Fasciotomy techniques and **EPF** resulting in minimal incisions and scarring, immediate ambulation and often back in a shoe in one week.

If you can't remember when your feet didn't hurt, now is the time to give us a call!

FLYAP Celebrates 11 Seniors at Orleans/Niagara BOCES

Medina - The Finger Lakes Youth Apprenticeship Program (FLYAP) held a Signing Day at the Orleans Career and Technical Education Center (OCTEC) Tuesday to celebrate nearly a dozen students. The Orleans Niagara BOCES has participated in each of the FLYAP's three years.

Eleven seniors are in the middle of their paid co-ops at eight companies throughout the Orleans-Niagara region. All are in the Advanced Manufacturing and Engineering program at OCTEC where they are learning CNC Machining, fabrication and more. Those seniors are: Bryan Baes (Royalton-Hartland), Xavier Fisher (Medina), Dominick Green (Albion), Christopher Kerr (Newfane), Jacob Lundy (Newfane), Michael Page (Newfane), Michael Pasquale (Newfane), Tanner Preston (Albion), Charles Rickard (Royalton-Hartland), Nate Sauls (Newfane) and Bobby Vidovich (Medina).

"OCTEC prepares these students for everything from 'Matching Day' interviews, to

on-the-job skills to post high school career readiness," said RTMA Director of Workforce Development, Rich Turner. "We are proud to add these 11 students to the FLYAP family as they are all excelling at their paid co-ops throughout the region."

The Orleans Niagara BOCES was one of the first schools to join FLYAP. To date, nearly 140 students have participated in job shadows and paid co-ops through the Finger Lakes Youth Apprenticeship Program. For more on youth apprenticeships in the Greater Rochester and Finger Lakes regions, check out FLYAP.org.

"We want to extend a special thank you to the companies who are working with our students," says Advanced Manufacturing and Engineering teacher Bill Rakonczy. Those companies are: Custom Laser, E&R Machine, J.W. Burg Machine and Tool, Niagara Precision, Nuclear Alloys, Performance Manufacturing, Phinney Tool & Die and Voss Manufacturing.

Did you know?

It's no secret that a good-looking lawn can entice buyers when selling a home, but homeowners may not realize just how much they can benefit from even the smallest investments of time and money in their home exteriors. According to the Top Agent Insights Q2 2019 Report from HomeLight, low-cost outdoor home improvements to a landscape provide sizable returns on investment. For example, the report found that a \$268 investment in a lawn care service can lead to a \$1,211 increase in home value at resale. Similarly, \$340 worth of fresh mulch can increase home value at resale by \$769. More than 85 percent of real estate professionals who participated in the HomeLight survey recommended other small and simple projects, including removing dirt, grime and cobwebs from a home entrance and trimming trees and shrubs prior to putting a home on the market. ■

Explaining easements, setbacks and CCRs

Property setbacks as well as easements and conditions, covenants and restrictions (CCRs) must be considered before renovating an existing home or building a new one. Setbacks are mandated buffers between surveyed property lines and permanent structures. Easements are legal designations that enable individuals or entities to use portions of a person's property for physical access or to build on it for one reason or another. Easements may be owned by utility companies for gas lines or government agencies when sidewalks are on a private

property. Additional examples of easements include greenbelt conservation easements, beach easements or view easements, according to The Spruce, a home and lifestyle resource. CCRs include rules established by many planned communities, subdivisions and planned unit developments. CCRs, easements and property setbacks can affect which type of renovations are allowed on particular plots and may affect the issuance of permits. It's essential to learn about property easements, CCRs and setbacks in advance and discuss them with contractors when drawing up preliminary plans. Your property deed or plat map as well as the local building inspection offices can highlight any regulations that may be in effect on your property and if they may affect future projects. ■

Add Flavor to Your Next Fiesta

Is shrimp on the menu tonight? Maybe it should be. Coming in at just around seven calories per medium-size shrimp, this crustacean is low in calories and high in lean protein and is one of only a few dishes that provides the beneficial antioxidants selenium and astaxanthin, according to The American Shrimp Company. The majority of North American shrimp is harvested from the Gulf of Mexico, ensuring fresh catches for the U.S. and Canada. Around 244 million pounds of shrimp are produced each year.

An abundance of shrimp means the opportunities for delicious meals are endless. For something with a lot of flavor and crowd appeal, try this recipe for a "Shrimp Quesadilla" courtesy of Eastern Fish Company. Plump shrimp are nestled between tortillas and seasoned with familiar Latin flavors, ideal for a fast meal any time.

Shrimp Quesadilla

Makes 6 servings

- 2 tablespoons vegetable oil
 - 1 onion, sliced
 - 1 red bell pepper, sliced
 - 1 teaspoon salt
 - 1 teaspoon ground cumin
 - 1 teaspoon chili powder
 - 1 pound uncooked medium shrimp, peeled and deveined
 - 1 jalapeño pepper, seeded and minced (optional)
 - 1 lime, juiced
 - 1 teaspoon vegetable oil, or as needed
 - 6 large flour tortillas
 - 3 cups shredded Mexican cheese blend
1. Heat 2 tablespoons vegetable oil in a large skillet over medium-high heat. Cook and stir onion and red bell pepper in the hot oil, stirring frequently, until onion is translucent, and peppers are soft, around 6 to 8 minutes.
 2. Stir salt, cumin and chili powder into onion and bell peppers.
 3. Stir shrimp into mix and cook until shrimp are opaque and no longer pink in the center, 3 to 5 minutes.
 4. Remove skillet from heat; stir jalapeño pepper and lime juice into shrimp mixture.
 5. Heat a skillet over medium heat and brush with about 1 teaspoon vegetable oil.
 6. Place a tortilla in the hot oil. Spoon about 1/6 shrimp filling and 1/2 cup Mexican cheese blend on one side of tortilla. Fold tortilla in half.
 7. Cook until bottom of tortilla is lightly browned, about 5 minutes; flip and cook other side until lightly browned. Repeat with remaining tortillas and filling.
