Sell It In

The Classifieds

In Our Printed and Online Editions!
 It's so simple to place your classified ad.

AT HOME...AT WORK...ONLINE...Day or Night
 Here's how...

OPTION 1:
 Email your ad to classifieds@windsorpress.com. Specify the number of weeks in East Penn Valley and/or Northern Berks Merchandiser. Please include your full name, address & phone number. You may call in with your credit card number, expiration date, and CVC code, or we can call you for it during regular office hours.

OPTION 2:
 Fill out the simple form located in each week's paper & mail with your check or money order, or provide a Visa, MC or Discover card number, expiration date and CVC code.

OPTION 3:
 Fax your ad to 610.562.2770. Specify the number of weeks to be run in East Penn Valley and/or Northern Berks Merchandiser. Please include your full name, address & phone number. You may call with your credit card number, expiration date, and CVC code, or we can call you for it during regular office hours.

OPTION 4:
 Place your ad by phone by calling 610.562.2267 Monday thru Friday, 10 am to 4 pm. You will need to provide a credit card number, expiration date & CVC code.

OPTION 5:
 Come in and fill out the form located at our office at 6 North Third St., Hamburg, PA.

Rates are listed in the ad form in each week's papers. Regular ad (20 words or less) \$5.30 per paper per week, 10c a word over 20 words. \$2.00 additional for bold type. Commercial ads are \$8.70 for 20 words or less, 10c a word over 20 words and are automatically in bold type.

What are you waiting for?
 (All printed editions automatically go in our online editions)

Recipe

SAUSAGE AND PEPPERS

3 lbs. sausage
2 lbs. onions
3-4 bell peppers
2 T. minced garlic
salt and pepper to taste
1 c. water

Bake sausage in oven at 350 degrees for 45 minutes. Chop onions and peppers, into slices. After sausage is cooked, slice into 1/2 inch pieces. Put back into the baking pan or dish, add onions, peppers, garlic, and salt and pepper Pour in cup of water and cover with aluminum foil. Bake at 350 degrees for 1 hour. Mix the sausage then add more water if needed. Cover and bake for an additional 30 minutes or until done.

Once Upon A Time....

There was an owner of a very successful hot dog stand. This owner built his business by having the best hot dogs around and by letting his customers know about them through extensive advertising. His business was so successful that he was able to send his son to a prestigious Ivy League school where his son was studying to receive his M.B.A.

One day the son came home for a break and promptly questioned his father "Dad, don't you know that there is a recession going on out there?" The father replied that his business was going very well, but the son persisted telling his father "Dad, you've got to cut back." So the father, figuring his son knew all about business, followed the son's advice. He promptly cut his advertising budget and then cut his hot dog & bun orders. Before long, business in fact did slow down. So the father replied to the son "You were right, son. Business is terrible. There is a recession going on out there."

How To Prepare Your Car For Winter

Summer and fall can stake their claim as road trip season, and even devoted drivers may admit that winter is generally a less desirable time to take to the open road. The elements factor heavily into that reputation, as fewer hours of daylight, snow and ice are just some of the variables that can make it less enjoyable, and potentially more dangerous, to drive in winter.

In anticipation of adverse driving conditions, vehicle owners can take various steps to prepare their cars and trucks for winter.

• **Upgrade your wiper blades.** Perhaps nothing is compromised more than visibility when driving in winter compared to other times of year. Snow makes it hard to see when driving, but fewer hours of daylight also can affect visibility. In fact, the Insurance Institute for Highway Safety reports that approximately half of all fatal crashes occur between 6 p.m. and 6 a.m., even though the number of drivers on the road during those hours is considerably lower than it is during the daytime. The difficulty of driving at night is even more sig-

nificant when wiper blades are not up to the task of keeping rain and snow off drivers' windshields. Prior to winter, inspect wiper blades and upgrade them, if necessary. Streaks left on a windshield are a telltale sign that blades need to be replaced.

• **Purchase winter tires.** Winter tires may not be necessary in regions with relatively mild winters. However, drivers accustomed to winters marked by heavy snowfall and/or icy roads should consider replacing their existing tires with winter tires.

Many newer vehicles are now equipped with all-season tires, which the tire experts at Bridgestone note provide great performance but are not designed to handle extreme winter conditions like snow and ice. Winter tires are specially designed to handle such conditions, making them a worthy investment for drivers who live in regions where it's not unusual to encounter snow and ice throughout the winter.

• **Study up on your engine oil.** Some vehicle manufacturers

recommend different grades of oil depending on the range of temperatures a car or truck will be driven in. The owner's manual will likely indicate if the manufacturer recommends using a different type of engine oil in especially cold temperatures. Even if the manual does not include such a suggestion, drivers can seek the advice of a local mechanic.

• **Schedule a pre-winter tune-up.** Even if a vehicle is not due for a tuneup, it can be wise to have it looked over by a local mechanic before the arrival of harsh winter weather. A mechanic can check the radiator, hoses and other components that could be affected by especially cold weather in the months to come. If any issues are found, address them immediately. After all, it's better to be proactive than leave yourself vulnerable to breakdowns or other issues once the mercury drops.

As fall gives way to winter, drivers can take steps to keep their cars running strong and safe in the months ahead.

WELCOMING PAST AND FUTURE CUSTOMERS

Any number of issues can affect drivers while on the road. Few issues may prove more disruptive than a flat tire. Flat tires can delay road trips and adversely affect commutes, all the while posing a significant safety hazard. Changing a flat tire is a valuable skill that all drivers should have in their repertoire, and this simple guide can help motorists hone their tire-changing skills.

- Take stock of your tire-changing tools. Vehicles typically come with the tools drivers need to change a flat tire, especially if the car or truck was purchased from a dealership. In addition to a spare tire, the tools drivers will need include a jack and a lug wrench. Tire wedges are not absolutely necessary, but when placed in front of or behind the tires, they can prevent rolling

A Step-By-Step Guide To Changing A Flat Tire

while changing the tire. A small flashlight kept in the glove compartment or center console storage also can be helpful, but drivers also can download a flashlight app on their smartphones to provide some extra illumination when changing a flat at night.

- Turn on your hazard lights and find a safe place to pull over. The moment drivers recognize a tire is flat, they should turn on their hazard lights and find a safe place to pull over. Avoid changing tires on narrow shoulders, as that leaves you and your passengers vulnerable to oncoming traffic. If you must, drive on the rim until you can find a safe place to pull over and change the tire. If possible, pull into an empty parking lot. Flat ground is ideal, as it can prevent the car from rolling while the tire is being changed.
- Apply the parking brake upon stopping. The parking brake can reduce the risk of the vehicle rolling while the tire is being changed, so always apply it before getting out of the car.
- Place the wheel wedges in the appropriate place. If you have wheel wedges, place them in front of the front tires when changing a rear tire and behind the rear tires when changing a front tire.
- Remove the hubcap. Some vehicles are equipped with hubcaps that cover the lug nuts. If that's the case, then remove the hubcap before lifting the vehicle with the jack. If that's not the case, simply loosen the lug nuts, which may require a little extra effort since lug nuts tend to be on very tight. At this point, it's easier

to loosen the lug nuts than remove them entirely, which can be done once you're ready to remove the tire.

- Put the jack to work. Now it's time to place the jack and ultimately lift the vehicle. The experts at Bridgestone Tire note that many modern vehicles now have areas of exposed metal on the bottom designed specifically for jack placement. Consult your owner's manual to find this spot, and then raise the vehicle until the tire is about six inches from the ground.
- Remove the lug nuts. Once the tire is off the ground, remove the already loosened lug nuts, ideally placing them in a small receptacle or bag so they won't roll away.
- Remove the flat tire. Using both hands, grip the tire by the treads and gently pull it off. Bridgestone recommends placing the tire on its side so it does not roll away.
- Mount the spare. When mounting the spare, gently push the tire on until the lug bolts can be seen through the rim.
- Tighten the lug nuts. One by one, place the lug nuts back on the bolts and tighten them by hand. Tighten them as much as possible so they're able to hold the spare on as effectively as they held the original tire in place.
- Lower the vehicle. Patiently lower the vehicle using the jack until the spare tire is resting on the ground but not with the full weight of the vehicle on it. At this point, Bridgestone recommends drivers use their full body weight to tighten the lug nuts once more

before fully lowering the vehicle. Once the vehicle has been lowered, some drivers may notice the hubcap does not fit over their spare. That's alright, as it's safe to drive without a hubcap covering the spare. In such instances, place the hubcap in the trunk when you're putting back the jack, wrench and flat tire. But if the hubcap does fit over the spare, put it back on.

- Check the pressure on the spare tire. A portable inflator can indicate the tire pressure in the spare and inflate it if need be. Drivers who cannot determine the pressure in the spare should drive slowly to the nearest service station and have the pressure checked or even the spare changed to a new tire, if possible.

The Role Of Engine Air Filters

Vehicle engines include complex parts that work in concert to ensure that the car functions properly. When servicing their cars and trucks, vehicle owners may look to many parts of the engine yet overlook a relatively mundane, albeit important, component: the air filter.

All cars come equipped with air filters, which are essential to optimum engine operation. The engine air filter is the first line of defense against outside air that is being brought in to the car engine to be burned along with fuel to produce combustion. The filter will capture particulate mat-

ter that would normally enter a vehicle's engine and leave sediment. The automotive resource It Still Runs says dirty air can reduce engine efficiency and cause damage over time.

Dirty air can compromise the air/fuel mixture that is involved in combustion. Any debris that enters portals in fuel injection systems can compromise that system. In addition, debris can cause fuel to burn less efficiently, resulting in poor fuel economy.

There is no simple answer as to how often an engine air filter should be changed. It largely

depends on miles driven and the environment in which the vehicle is used. Those who reside in rural or dusty areas will need to replace air filters more frequently. Drivers also can install air filters more suited to dusty areas. An engine filter is not the only filter in a vehicle. There also is a cabin air filter. The cabin air filter does not affect engine performance, but it does help to provide clean air inside of the vehicle. The cabin air filter helps to keep dirt, pollen, bacteria, exhaust gases, and dust from entering the HVAC system. It also can be a barrier against

bugs, leaves and other particles from clogging up the system. The cabin filter also helps to keep the air fresh and odor-free. A clogged filter can result in diminished heating and air conditioning performance, so it's important to change this filter as well.

The Basics Of Auto Insurance

Traffic laws are designed to keep everyone on the road as safe as possible. That motivation also is behind laws governing auto insurance, which is required in Canada and the vast majority of American states.

What is auto insurance? Auto insurance is something that most drivers have but very few, if any, hope to use. According to Insure.com, car insurance is an agreement between the policy holder and an insurance company which protects the individual against financial loss if the vehicle is stolen or involved in an accident. The Insurance Information Institute says auto insurance provides property, liability and medical coverage. Property coverage covers damage or

replacement of the vehicle. Liability coverage is for the policy holder's legal responsibility to others for bodily injury or property damage. Medical coverage pays for the cost of treating injuries, rehabilitation and sometimes even funeral expenses or lost wages.

Compulsory vs. mandatory coverage: Depending on where a policy holder lives, there are certain coverages that are compulsory, or mandatory coverages that are the minimum amounts required by law. Optional coverages also can be purchased to suit one's needs. Compulsory coverage may vary based on location, driver's age, type of vehicle, and type of financing on that vehicle. It is best to discuss

coverages with an automotive insurance agent to figure out which types of coverage will be needed and to get a price quote. The six basic kinds of coverage include:

- bodily injury liability
- personal injury protection
- property damage liability
- collision
- comprehensive
- uninsured and underinsured motorist coverage

Premiums vary: Insurance typically is sold with deductibles, according to the III. Policy holders may opt for higher deductibles so they can lower their premium costs. Additional factors that will affect the cost of coverage include driver's age, driving record and location where the vehicle is housed or used. Credit score and gender also may affect premiums. Defensive driving courses and protecting the vehicle with anti-theft devices may help lower premiums.

Auto insurance costs vary by a significant amount, so it is a good idea to shop around and compare quotes. Bundling of auto insurance with other policies, such as homeowners insurance or umbrella policies, may help reduce rates.

Getting insurance: To obtain an insurance policy, the agent will need the year, make and model of the vehicle being insured. For the most accurate price quote, the VIN number will be needed. To buy auto insurance, one needs to be the registered owner of the car. Some states allow dependent and independent drivers to own a car in their own names at age 16 or 17. Some parents opt to combine insur-

ance coverage for their teenagers because the premiums may be cheaper. Teenagers tend to be riskier in the eyes of insurance companies due to their lack of experience and perceived recklessness. Those factors are reflected in premium costs. Insurance is something every driver should have. Motorists can explore their options to find policies that fit their needs and budgets.
