## ★ Voters of Mount Morris ★ Joe Rawleigh for Village Trustee

First off, thank you for allowing me to serve you for 4 years. It has been a great pleasure to be a part of the village organization. Looking back, I am proud of what we have accomplished. In my 4 years, we were able to finish the boat launch, replace 2 streets, complete 3 murals and upgrade a large sewer plant. We have revamped the village police department, including many new faces, as well as add new upgraded equipment, making our officers more productive and efficient. The board has also provided new necessary equipment to the DPW.

**VOTE**  
**March 21st 2023**  
**MMCS gymnasium**  
**12:00-9:00 pm**

Together we found a quality code officer and were able to move him into a full time slot to better serve the Village's needs. And we have done all of this while creating a healthy fund balance allowing us to plan for the future.

The future includes more village street repair, water improvements, solar laws, upgraded equipment and much more. For once, the village is in a position to lead from the front.

Together, the current board has been able to take our Village from a financial hardship to sustainable as graded by the NYS Comptroller.

To all the residents, I ask that you allow me to continue this process. Our Village is on the rise but there is more to do and I ask for your support on March 21st to continue the work for you.

Thank You

# The Opossum

North America's only marsupial is our opossum. Their babies migrate to the pouch when they are the size of a bee and mature over eighty days. They are not a rat. Their tails are fifth limbs. They have higher intelligence than most pets and groom themselves often. As scavengers, they eat our garden pests without damaging the garden: slugs, snails, rats, mice, snakes and thousands of ticks, berries and seeds.

They are generally immune to rabies, venomous snakes and lyme because of their low body temperatures. Though they may hiss and growl they are not aggressive. An involuntary defense causes them to faint when scared, emitting a foul odor to keep predators away. They can remain in this state for hours.

They only live a couple years or so and are so beneficial to our environment. If you had lyme disease just once, you'd want many of them out there destroying ticks.

So please, give them safe passage when they cross your path. Learn more about them. Don't judge them by their cover! Mark Schneck
