Volunteers from Unity Bank in Crosby picked up along CR 31

The Crow Wing County Highway Department is starting the third year of the Pick A Mile Program. The program was rolled out in June 2021 for residents to pick a mile of county roads to assist in roadside cleanup. An easyto-use app allows residents to reserve an available stretch of road to cleanup as a family, business, or organization. The program also brings a sense of pride and ownership to county roads.

"The program really picked up some speed last year as more groups signed up to clean up in 2022," said Highway Maintenance Supervisor Jory Danielson. "We encourage others to volunteer to help keep our county roads and ditches clean. We know our residents are passionate about pitching in. The Pick A Mile program turns community involvement into cleaner roadsides. It is also a simple

and social way to ensure our roadways are clean and prevent pollution from entering our lakes and rivers."

The Pick A Mile app allows resident to choose a specific two-mile section of county roads to cleanup, see what roads have already been cho-

sen and what county roads remain available.

Residents are encouraged to pick up litter on both sides of the road at least two times a year for at least two years. Many roadside cleanup weekends are coordinated

# Catch-and-release pike record tie

An angler caught and released a 46 1/4 inch northern pike on Mille Lacs Lake that the DNR certified as a tie with the current catch-andrelease state record.

Brad Lila of Hudson, WI, caught and released the fish Jan. 22.

"I set the hook as the line was quickly peeling out," Lila said. "Immediately, I knew it was a very large fish because it peeled out drag and

there was no stopping it. After about 10 minutes of fighting the fish, I knew that it might take more than me to land it."

Lila hollered and waved for help and two nearby anglers came to his aid. Lila tried to get the fish to turn its head to come up the hole, but the fish was large and slush under the ice complicated the endeavor.

"Every time she would get near, a few inches of slush

would come up and we couldn't see down the hole," Lila said. "An additional challenge was that my braided line would groove the bottom of the ice and when my knot connecting the fluorocarbon leader would meet the ice bottom, it would get stuck. I'd have to put my rod down into the hole to free up my line and then my line guides was able to get the fish through the ice and get quick measurements before releasing it back into the water. The fish was most likely a female that was carrying eggs before spawning.

"It was so satisfying seeing her swim away," Lila said. "I am so very appreciative of the state of Minnesota for supporting a catch

and release [record fish] program. It's great to know that she's out there passing along those incredible genes and that someone else may have a chance of landing her someday."
