Message From James Vacca
NYC Councilman 13th District

OPEN LETTER ON OVER DEVELOPMENT

From the beginning of my 35-year career in public service I have fought vehemently against over development and have been a strident supporter of down zoning, lower density management and additional controls on permissible development.

In the early 2000's, as District Manager of Community Board 10, I led the vast downzonings of our community. Huge portions of my council district were down zoned, reducing the scope of what could be built. The City stated that locations could not be down zoned out of the context of the surrounding blocks. For example, if there were a number of apartment buildings on a given street, a downzoning to a low density zone would not have passed a legal challenge and would have been rejected by the courts. If an area was zoned for large development, but was comprised of 2 family homes, that block was a candidate for down zoning. I personally reviewed the map and recommended downzonings anywhere it was legally possible. Many of my recommendations were implemented.

In 2006, after my election to the City Council, I was able to designate portions of our community as a Lower Density Growth Management Area, which are the only locations outside of Staten Island to get such a designation. Because of this law, there are additional parking, open space, and side yard requirements in various zones.

Additionally, I spend time almost every day on the Buildings Information System looking at applications. I dedicate significant staff resources to evaluating proposed applications and making formal challenges to the Department of Buildings. Through these challenges, I've been able to reduce the size and scope of dozens of projects. There is nobody in this area that fights harder against over development than I do, or has delivered results that protect our quality of life.

As an elected official, I use my knowledge of zoning laws to challenge development at each and every turn. I work within the legal zoning structure to make sound arguments against specific features of a building application. Screaming in the street will not stop or reduce the scope of a development. Making uninformed and ignorant assertions will not stop or reduce the scope of a development. Producing inaccurate and misleading flyers will not stop or reduce the scope of a development. Only a careful evaluation of an application and a logical argument based on existing zoning law has any chance of success. Some would rather scream while I prefer to act. I will keep fighting for this community up until and even beyond the very last day of my term in December of 2017.
