Tips on how to write CLASSIFIED ADS that sell!

- 1 **USE A KEY WORD.** This immediately tells the reader exactly what you have to sell.
- 2 Make your description **CLEAR AND FACTUAL.** State the year, make, model, color & size and tell what condition the item is in. Also, state the special features.
- 3 **STATE THE PRICE.** Successful classified advertisers have learned that the price in an ad helps increase the chances for results.
- 4 **IF THERE IS A GENUINE SENSE OF URGENCY,** say so. The words "We're moving," or "Must sell fast," suggest that readers respond immediately.
- 5 **INCLUDE YOUR PHONE NUMBER.** Classifieds get results fast and often generate immediate sales. If you cannot be available to answer the phone at all times, be sure to specify special calling times such as "after 9pm" or "before 11am."

As the years past, she enjoyed ending her night with a vodka and tonic. Hummingbirds were a favorite thing to look forward to each spring. Harriet always looked forward to spending the cold winter days in Florida staying with family for extended periods. Family was most important to Harriet. In addition to her parents, Mrs. Draper was predeceased by her beloved husband, Robert (2010); and her brother, Charles (2002) & wife Carol Bracey (2018). Left to cherish her memory are her loving children, Susan Draper, Deborah Nichols (fiancé Joseph), Robert (Vanessa) Draper, Jr., Timothy Draper and Thomas (Annie) Draper; grandchildren, Patrick Kempton, Jeffrey (Jessica) Nichols, Julianne (Steve) Schumacher, Trisha Draper, Renee Draper, Casey Button, Christopher Draper, Spencer (Maddi) Draper and Christian Draper; great-grandchildren, Allie, Taylor, Quinn, Cole, Evan, Aidan, Hayden, Julia, Maddison and Audry; brother, Robert (Joanne) Bracey; sister, Mary Jane Frederick; former son-in-law, Gregory Nichols; and several nieces and nephews. Refill with Randy

By Randy LeBaron

Good morning! Grab your favorite cup. Fill it up. And let's start this week right... TOGETHER!!!

Two weeks ago I shared a little background about myself and my colleague Julia Alt in order to help people understand the impact of Hospice not only on those who receive services but on those who give it as well. I hope to get the chance down the road to share the perspective of our extremely hard working nurses, aides, and other staff as well but today I want to tell you about two others who know firsthand what it's like to go through the grief of losing a loved one.

The first is Marilyn Almeter-Milbrand who you may recognize from her past work as she has been a nurse for 28 yrs. serving primarily in Medina and Batavia. I however met Marilyn for the first time more recently when she came out of retirement to help out part-time at Hospice and then was subsequently moved into her current full-time roles of Administrator and Director of Patient Services. One thing that quickly stood out to me about Marilyn was that she had a nurse's heart. Even though her role is primarily administrative, she does still fill in as a nurse from time to time when necessary, it is very evident that she does not view either patients or their caregivers as just numbers but rather as real people who deserve quality and compassionate care. It wasn't until recently though that I discovered at least part of the reason behind her compassion and attentiveness—she herself has had to walk the difficult road that many of those under hospice care are currently going through.

When Marilyn's son was 18 yrs. old he was diagnosed with bone cancer, which of course would be devastating news for any mother to have to hear, but thankfully he responded to treatments and is complete remission to this day. Unfortunately for Marilyn though that was not the only time she had to respond to difficult news. During the pandemic her husband came down with Covid and was then taken to the hospital where he would stay for 12 days on life support. For the first 11 days Marilyn could not see him due to the hospital's restrictions and then finally, on Day 12, she was able to say goodbye before life support was removed and he quickly passed.

I asked Marilyn if her experience led her to want to work for Hospice and she answered honestly that she didn't know a lot about Hospice prior to coming on board but that's she has learned a ton since and is very thankful to be part of an organization where "everything we do takes the community into account" such as the recent changing of our name from Supportive Care back to Hospice of Orleans so that the community is aware that we are still here and we want to help. She also said that she loves the idea of the Martin-Linsin Residence, our Hospice Home located on Rt. 31 in Albion, because it offers all-inclusive care and considers not only the patient's but also their loved one's needs. I for one am very thankful to have Marilyn on board to head up our team.

My other colleague that I want to share about today is not only one of the newest to join the team but also probably the person who has had the most first-hand experience being on the receiving side of Hospice of Orleans services. Heather Rowley became a Social Worker as a result of her earlier experiences in life and initially served immigrants and refugees before joining our team a little over 4 months ago.

Heather learned about hospice services at the young age of 20 when her father was diagnosed with terminal esophageal cancer in

2010 and began to receive services in their home until his passing. Heather, who was going to college at Ithaca at the time, returned to her studies only to have her mother be diagnosed in 2012 with terminal brain cancer. Not only did she have a glioblastoma, which was the same deadly tumor my own mother died from earlier that same year, but she also found herself in the similar situation of wanting to move her mother into a hospice home but the Martin-Linsin Residence was still in the process of being built. After waiting a while, hoping for construction to be completed, her mother ended up going to Strong Hospital where she would receive palliative care until her eventual passing. Not only did Heather suffer the trauma of losing both parents but she also took over the responsibility of helping to raise her 3 younger siblings who were still in elementary, middle, and high school respectively.

When I think about all that Heather has been through personally it comes as no surprise when I see how diligently she has cared for both the patients and their families during her time at Hospice. In spite of her history with Hospice Heather did not seek out a position specifically for that reason but admits that having been on the other side certainly "gives her some street cred" which can go a long way when helping someone through a crisis. When I asked if there was anything she would want others to know she responded, "For the bereaved, death is both the most normal yet isolating thing. You are not alone."

So there you have it folks. I hope that getting to see behind the curtain a bit helps you to understand that Hospice work is not so much a job as it is a calling. Again, I hope to share more from other's perspectives down the road but this is it for now. I will be back with another article in 2 weeks and that will also be when we are having our Hospice Walk to Remember at Holley Falls on October 7th (my mother's birthday) check out the information below. Also check out our Grief Support Group if you have experienced a loss.

See you in two weeks!

Healthy Choices

— Your guide to looking and feeling your best —

Do you have HEEL pain or ARCH pain?

HEEL SPUR SYNDROME/PLANTAR FASCITIS is a common problem among people who are active. It starts as a dull intermittent pain in the heel which may progress to a sharp persistent pain. Classically, it is worse in the morning with the first few steps, after sitting, after standing, or after walking.

- Plantar fasciitis often begins with irritation and tearing of the fibrous band of tissue on the bottom of the foot, which may eventually result in the formation of a heel spur.
- Contributing factors: flat pronated feet, high arched feet, poor shoe support, increased age, sudden weight increase, increased activity level, family tendency.
- Approximately 2-3 times your body weight of force is exerted on each foot with walking. Flexible, non-custom molded arch support found at those advertised shoe stores cannot support these forces and usually do not provide long-lasting relief, do not come with a lifetime warranty, and are typically more expensive than custom-molded ones made by our office.
- 95 percent of our patients symptoms are resolved with conservative treatment, avoiding surgical intervention.
- We also offer surgical procedures with the best post-op success rates using Endoscopic Plantar Fasciotomy techniques and **EPF** resulting in minimal incisions and scarring, immediate ambulation and often back in a shoe in one week.

If you can't remember when your feet didn't hurt, now is the time to give us a call!

Oak Orchard Health Makes Healthcare Easier.

By Estela Sanchez Cacique, Patient Engagement Services Manager, Oak Orchard Health

Have you seen our Mobile Medical Unit?
Getting health care services isn't always easy. At Oak Orchard Health (OOH), we focus on breaking down barriers to care for our patients. At OOH, we understand that at times it can be difficult to get the care you need. That is why we will work to help you navigate through any barriers to care by providing support services that are free of charge to our patients. Offering these services is what makes a community health center different from other healthcare options in the region. Our Community Health Workers are here to help provide services directly to our patients or refer them to local community agencies.

We have a state-of-the-art Mobile Medical Unit (MMU) which is out in the community at libraries, community events, and other partnering agencies. The MMU is where you can get same-day appointments, physicals, and referrals to other community agencies. We look forward to working collaboratively with our local County Health Departments, partnering agencies like Head Start programs, and organizations for the homeless to bring the Mobile Medical Unit closer to those in need.

Need transportation for medical or dental visits?

By Estela Sanchez Cacique, Patient Engagement Services Manager, Oak Orchard Health

Oak Orchard Health has eight vans stationed at our health centers that can provide transportation services to and from your appointments at no charge. Please give us at least three days' notice so that we can plan to accommodate your trip. Unfortunately, our vans are not handicap accessible but folding wheelchairs are the exception if the patient is mobile and can get themselves in and out of the van without any assistance. If you require assistance getting in and out of our vans, we recommend that you bring someone along who can help you.

We provide medication delivery services if there are no copays on any of the prescriptions. Or we can take patients to the pharmacy to pick up their medications, whether that is on the way home from their appointment or another day.

Oak Orchard Health provides transportation services for specialty care visits, or any type of testing or lab services not offered at OOH, even if it is in Rochester. We also provide transportation to the local food pantry, if a patient is home-bound but needs a food basket delivered. OOH is also available to meet that need by delivering it directly to the patient's home.

English isn't your first language? No problem.

At Oak Orchard, we have Bilingual (English and Spanish) Community Health Workers on staff along with a Bilingual medical provider who speaks Spanish at our Batavia location. We also use interpretation services for other languages that are not available in-house. For patients with ASL needs, Oak Orchard Health uses an in-person ASL interpretation service.

Open enrollment for health insurance started June 1, 2023!

If you have not already recertified for your health insurance through the New York State of Health, now is the time to do it. During the pandemic, you did not need to recertify but that has now changed. If you receive health insurance through the New York State of Health, you need to reach out to a facilitated enroller to ensure there is no gap in your coverage. Some of our Oak Orchard Health locations also have facilitated enrollers working out of their health centers. For more information, please contact your local Oak Orchard Health Center or the marketplace website: www.nystateofhealth.ny.gov

Sliding Fee Scale Program or health insurance?

If you are uninsured or have a high deductible plan, we offer a sliding fee scale program that can help offset the cost of some of your medical costs here at Oak Orchard Health. This program offers patients discounts on services based on family size and annual income. Patients approved for the Sliding Fee Program must also pay their co-pay at the time of the visit.

The bottom line is that we are here to help you get the healthcare services you need. Call Oak Orchard Health at (585) 637-3905 to discuss any of these support services if you need them.

The Power of Patient Portals:

Empowering Patients for Better Healthcare Outcomes

In today's digital age, technology continues to revolutionize the healthcare industry, making it more patient-centric and efficient. One such advancement is the introduction of patient portals, which have proven to be invaluable tools in fostering patient engagement and improving healthcare outcomes.

It's time to delve into what patient portals are, their impact on patient participation, and the evidence from studies that underscores their importance in modern healthcare.

WHAT ARE PATIENT PORTALS?

Patient portals are secure online platforms that give individuals direct access to their personal health information, typically provided by their healthcare providers or institutions. These portals offer a range of features, including:

- 1. Access to Medical Records:** Patients can view their medical history, lab results, medications, and treatment plans.
- 2. Communication:** Patients can send secure messages to their healthcare providers, facilitating direct and convenient communication.
- 3. Appointment Scheduling:** Many portals allow patients to schedule appointments, request prescription refills, and receive appointment reminders.
- 4. Educational Resources:** Portals often provide resources, such as educational materials and links to trusted health information, to help patients make informed decisions about their health.

EMPOWERING PATIENTS THROUGH STUDIES

Over the past decade, numerous studies have examined the impact of patient portals on healthcare outcomes. The results consistently show that patients who actively use portals are more likely to take control of their healthcare journey, adhere to their providers' recommendations, and achieve better health outcomes.

1. Improved Medication Adherence

One key aspect where patient portals excel is medication adherence. Studies have shown that patients who regularly access their medication lists and receive medication reminders through portals are more likely to take their medications as prescribed. This leads to better management of chronic conditions and reduces the risk of complications.

2. Enhanced Communication

Effective communication between patients and healthcare providers is fundamental to quality care. Patient portals facilitate secure messaging, enabling patients to ask questions, seek clarification, and report concerns directly to their providers. Studies confirm that improved communication leads to better understanding of treatment plans and increased patient satisfaction.

3. Engagement in Preventive Care

Patient portals often display preventive care reminders, such as vaccination schedules and recommended screenings. Patients who use these portals are more likely to stay up to date with preventive measures, ultimately reducing the likelihood of preventable illnesses and complications.

4. Timely Access to Test Results

Quick access to test results is crucial for informed decision-making. Patients who use portals can view their lab results as soon as they are available. This timely access empowers patients to discuss results with their providers promptly, enabling faster adjustments to treatment plans when necessary.

CONCLUSION

Patient portals have transformed healthcare by putting patients at the center of their own care. The evidence from various studies is clear: Patients who actively engage with these portals are more likely to adhere to their treatment plans, communicate effectively with their healthcare providers, and ultimately experience improved health outcomes. As technology continues to advance, patient portals will remain a vital tool in promoting patient empowerment and enhancing the quality of healthcare delivery.

Do you have HEEL pain or ARCH pain?

HEEL SPUR SYNDROME/PLANTAR FASCIITIS is a common problem among people who are active. It starts as a dull intermittent pain in the heel and progresses to a sharp persistent pain. Classically, it is worse in the morning with the first few steps, after sitting, after standing or after walking.

- Plantar fasciitis often begins with irritation and tearing of the fibrous band of tissue on the bottom of the foot, which may eventually result in the formation of a heel spur.
- Contributing factors: Flat pronated feet, high arched feet, poor shoe support, increased age, sudden weight increase, increased activity level, family tendency.
- 95% of our patients' symptoms are resolved with conservative treatment, avoiding surgical intervention.
- We also offer surgical procedures with the best post op success rates using Endoscopic Plantar Fasciotomy techniques (minimal incisions and scarring; often back in a shoe in 1 week).
