## Tips to revitalize a garden this spring

Gardening is a rewarding hobby that pays a host of significant dividends. Many people love gardening because it allows them to spend time outdoors, and that simple pleasure is indeed a notable benefit of working in a garden. But the National Initiative for Consumer Horticulture notes that gardening provides a host of additional benefits, including helping people get sufficient levels of exercise, reduce stress and improve mood.

With so much to gain from gardening, it's no wonder people look forward to getting their hands dirty in the garden each spring. As the weather warms up, consider these tips to help bring a garden back to life.

- **Discard the dead weight.** Winter can take its toll on a garden, even in regions where the weather between December and early spring is not especially harsh. Discard dead plants that have lingered into spring and prune any perennials that need it. Branches that fell during winter storms also should be removed at this point if they have not

previously been discarded.

- **Test the soil.** Soil testing kits can be purchased at local garden centers and home improvement retailers. Such tests are inexpensive and can reveal if the soil needs to be amended to help plants thrive in the months to come.

- **Mulch garden beds.** Mulching benefits a garden by helping soil retain moisture and preventing the growth of weeds. Various garden experts note that mulching in spring can prevent weed seeds from germinating over the course of spring and summer. That means plants won't have to fight with weeds for water when the temperature warms up. It also means gardeners won't have to spend time pulling weeds this summer.

- **Inspect your irrigation system.** Homeowners with in-ground irrigation systems or above-ground systems that utilize a drip or soaker function can inspect the systems before plants begin to bloom. Damaged sprinkler heads or torn lines can deprive plants of water they will need to bloom and ultimately thrive once the weather warms up.

- **Tune up your tools.** Gardening tools have likely been sitting around gathering dust since fall. Serious gardeners know that tools can be expensive, so it pays to protect that investment by maintaining the tools. Sharpened pruners help make plants less vulnerable to infestation and infection. Well-maintained tools like shovels and hoes also make more demanding gardening jobs a little bit easier, so don't forget to tune up your tools before the weather warms up.

It's almost gardening season, which means gardeners can start on the necessary prep work to ensure their gardens grow in strong and beautiful this spring.

## Renovations that help sell homes

The adage “there’s a lid for every pot” suggests that, even in relation to the real estate market, there’s bound to be a buyer for every home on the market. Price is a significant variable in the minds of potential buyers, but there are additional factors that can affect the impression people get of a given home.

Certain home features can tip the scales in favor of sellers. In fact, various renovations can help sell homes more readily. And these renovations need not cost a fortune. Putting a home on the market can be stressful, but these renovations may help it sell fast.

- **A fresh coat of paint:** Although painting is relatively inexpensive and a job that some do-it-yourselfers can tackle, it’s not a task relished by many. Painting is messy, it takes time, and requires moving furniture. In fact, prepping a room for painting often is the toughest component of any painting job. But fresh coats of paint can create a strong first impression. Choose a neutral color and get painting. Jennie Norris, chairwoman for the International Association of Home Staging Profes-

sionals, says gray is a “safe” color that has been trending in recent years.

- **Minor bathroom remodel:** Remove dated wall coverings, replace fixtures, consider re-glazing or replacing an old tub, and swap old shower doors for fast fixes in a bathroom. If there’s more room in the budget, replacing a tub, tile surround, floor, toilet, sink, vanity, and fixtures can cost roughly \$10,500, says HGTV. You’ll recoup an average of \$10,700 at resale, making a minor bathroom remodel a potentially worthy investment.

- **Redone kitchen:** The kitchen tends to be the hub of a home. This room gets the most usage and attention of any space, and it’s a great place to focus your remodeling attention. The National Association of the Remodeling Industry estimates that homeowners can recover up to 52 percent of the cost of a kitchen upgrade upon selling a home. Buyers want a functional and updated kitchen. Trending features include drawer-style microwaves and dishwashers, commercial ranges, hidden outlets, and even wine refrigerators.

- **Updated heating and cooling system:** Better Homes and Gardens reports that homeowners may be able to recoup 85 percent of the cost of new HVAC systems when they sell their homes. Heating, cooling and ventilation components are vital to maintain. You don’t want buyers to be taken aback by an older system, and many millennial buyers are not willing to overlook old mechanical systems.

- **Fresh landscaping:** A home’s exterior is the first thing buyers will see. If they pull up to a home with eye-catching landscaping and outdoor areas that are attractive yet functional, they’re more likely to be intrigued. Often buyers will equate a home that features an impressive exterior with upkeep inside as well. The American Nursery Landscape Association says the average homeowner may spend \$3,500 for landscaping.

Improving a home’s chances to sell quickly and at a higher price often comes down to making smart improvements that catch the eyes of buyers.
