BUSINESS SERVICES

The business services industry is a very broad industry encompassing many different categories of business operations; all of them provide some sort of non-financial service to other companies. These services include advertising, marketing, consultation, logistics (including travel and facilities services), waste handling, staffing services, shipping, administration, and security services to name a few. Nearly every business in operation has need for at least one of the different kinds of service offered by the industry. Marketing companies are responsible for increasing the sales of a client company by helping the company gain new customers as well as keep current ones. Legal services are needed to deal with business transactions, as well as for litigation purposes. Logistics and shipping companies are responsible for connecting businesses to other businesses or consumers by collecting, storing, transporting, and delivering products. Staffing companies match people in need of jobs, temporary or permanent, with companies in need of qualified employees. Leasing companies fill a client's need for certain items without requiring full purchase. Security companies are responsible for keeping a company's assets secure. Consulting companies are in the business of fulfilling needs for expertise that clients cannot fulfill themselves. These companies may offer professional, scientific, or technical consulting, management or strategy consulting, or human resources consulting.

October is Breast Cancer Awareness Month!

Each year in the United States, more than 245,000 women get breast cancer and more than 40,000 women die from the disease. Men also get breast cancer, but it is not very common. Less than 1% of breast cancers occur in men. Most breast cancers are found in women who are 50 years old or older, but breast cancer also affects younger women. About 10% of all new cases of breast cancer in the United States are found in women younger than 45 years of age. *Schedule your mammogram today!*

Staying at a healthy weight, being physically active, and limiting how much alcohol you drink can help reduce your risk of breast cancer. Regular screening can often find breast cancer early when treatments are more likely to be successful.
