HEAR What Our Customers Say!

One of the best decisions that I have made in a long time was when I decided to open the door at Long's Hearing Care in Cadillac Michigan. I went in for a hearing test. I was treated with respect from the second that walked in the door. Melissa met me at the front counter and took care of my needs in a very professional manner. I was tested and diagnosed for hearing aids. I was then

fitted and when I returned back in 3 days my hearing life was changed. I now don't have to ask people to repeat what they said or have to guess an answer to a question that I really didn't even hear. Today I hear everything loud and clear. Life has completely changed for me. Thank you to Melissa and Mike at Long's Hearing Care!!

Bob McKenzie, Grand Rapids Michigan

Spring Home & Garden

10 Home Maintenance Tips for Spring

After a long, dark winter, spring's bright sun and warm winds are a breath of fresh air. Here is a checklist to help you target the areas that need maintenance so you can get your chores done quickly, leaving you time to go outside and play in the sunshine.

Examine Roof Shingles

Examine roof shingles to see if any were lost or damaged during winter. If your home has an older roof covering, you may want to start a budget for replacement. The summer sun can really damage roof shingles. Shingles that are cracked, buckled or loose or are missing granules need to be replaced. Flashing around plumbing vents, skylights and chimneys need to be checked and repaired by a qualified roofer.

Probe the Wood Trim

Use a screwdriver to probe the wood trim around windows, doors, railings and decks. Make repairs now before the spring rains do more damage to the exposed wood.

Check the Gutters

Check for loose or leaky gutters. Improper drainage can lead to water in the basement or crawl space. Make sure downspouts drain away from the foundation and are clear and free of debris.

Use Compacted Soil

Low areas in the yard or next to the foundation should be filled with compacted soil. Spring rains can cause yard flooding, which can lead to foundation flooding and damage. Also, when water pools in these low areas in summer, it creates a breeding ground for insects.

Examine the Chimney

Examine the exterior of the chimney for signs of damage. Have the flue cleaned and inspected by a certified chimney sweep.

Inspect the Concrete

Inspect concrete slabs for signs of cracks or movement. All exterior slabs except pool decks should drain away from the home's foundation. Fill cracks with a concrete crack filler or silicone caulk. When weather permits, power-wash and then seal the concrete.

Move Firewood

Remove firewood stored near the home. Firewood should be stored at least 18 inches off the ground at least 2 feet from the structure.

Check Outside Faucets

Check outside hose faucets for freeze damage. Turn the water on and place your thumb or finger over the opening. If you can stop the flow of water, it is likely the pipe inside the home is damaged and will need to be replaced. While you're at it, check the garden hose for dry rot.

Service the AC Unit

Have a qualified heating and cooling contractor clean and service the outside unit of the air conditioning system. Clean coils operate more efficiently, and an annual service call will keep the system working at peak performance levels. Change interior filters on a regular basis.

Check Power Equipment

Check your gas- and battery-powered lawn equipment to make sure it is ready for summer use. Clean equipment and sharp cutting blades will make yard work easier.

Spring Home & Garden

Decorate for Spring: Simple Inexpensive Ideas

Don't spend a lot of time and money updating your home for this sunny season. Instead, follow these financially friendly tips.

1. Do a Three-Second Scan

With a pen and a small notepad, go into each room with your eyes closed. Open your eyes, and very quickly—in three short seconds—spot three objects in the room that visually bother you the most. Use that as your starting point for redecorating.

2. Add Simple, Chic Shelving

You can pack a punch with a great wallpaper by papering just the inside back section of a shelving unit. It's quick and easy to do, and you get the look you want without it taking over your entire room!

3. Play with Punches of Yellow

Nothing sings "spring" like the color yellow. A large white bowl or tall glass vase of lemons can bring instant and simple style into the kitchen for spring. Use beautiful objects that have a dual purpose for display and function—lemons are a fresh, inexpensive style accessory that are also readily on hand for cooking!

You can also bring pots of yellow daffodils into your living area to make the space happy. Plants are more cost efficient, last longer than freshly cut flowers and the bulbs can be replanted in the garden at the end of the season.

4. Get Crafty and Repaint Furniture

You can find and paint antique desks or dressers (you might even have one in the basement!) with a glossy crème and replace the hardware.

In the kitchen, paint old, outdated cupboard doors and cabinet framing with white or crème melamine, and switch out knobs for a new, updated look.

5. Keep It Airy and Light

Remove heavy drapes and replace them with sheer materials such as voile or lace. You can find affordable materials at local fabric stores or use old pieces of fabric found at flea markets. Simply pin up fabrics with some tacks or sew a rod pocket at either end.

Also, check flea markets for summer-inspired paintings of flowers, cottages and beach scenes. You can also fill bowls and vases of inexpensive sea glass and seashells to bring a piece of the beach inside.

Spring Home & Garden

Tackle Early Spring Gardening Chores

Do you ever get that urge to go out and do something in the garden, even though it may be too early in the year to do much? That's not to say there aren't things that can be done in the off-season, especially during the few weeks before the official gardening season begins.

Repair a Dry Stacked-Stone Wall

Late winter to early spring is an ideal time to reposition stones. Sometimes minor adjustments are all that's needed; simply moving the larger stones with smaller ones can stabilize the border. It doesn't take all that much time or effort, and the payoff is worth it in terms of enhanced aesthetics and safety.

Fix Uneven Stepping stones

Even stepping stones in the lawn can become unstable due to excessive rains or heaving, caused by alternating periods of freezing and thawing. So they too should be stabilized and leveled to make them safe to walk on. To fix, this requires that you actually lift the stones and add soil or gravel beneath them. Use a level to verify that they are even with the ground.

Correct Tunnels Made by Garden Pests

Unstable stones aren't the only hazards that can lead to a sprained ankle. There are also tunnels and mounds of dirt created by moles and gophers. They too should be leveled with a metal rake and tamped firmly. The exposed soil can later be reseeded with grass seed or left as.

Clean Birdhouses

Inspect birdhouses to make sure they're firmly mounted. Clean their feeders, filling them with fresh seed once they dry. Give birdbaths a good scrubbing and refill with water. Last but not least, create a pile of ready-for-the-taking nesting materials to make life a little easier for our feathered friends.

Spring-Flowering Bulbs

It's not unusual for the foliage of early spring-blooming bulbs to turn brown, especially at the tips, when temperatures drop suddenly. Although the foliage may not look all that great, the bulbs themselves will be just fine and will flower pretty much on schedule.

Now is a good time to do a quick sketch of where your bulbs are. This will help when the foliage fades later in the year and you begin planting annuals and perennials in the same bed. You'll have a map of where the bulbs are and avoid destroying them as you dig.

Touch Up Mulch

This is the ideal time of year to inspect your mulch, particularly its depth. Chances are organic mulches, especially those made from shredded or chipped wood, have decomposed somewhat or have been washed away by heavy rains.

With a metal rake, fluff your mulch a bit and try to level it out over your garden beds. Along the way, use a ruler to determine the average depth of the mulch. Ideally, you want at least a 2-inch layer.

Winter Pruning Trick

If you haven't already completed pruning your deciduous trees and shrubs, there's still time. First, stare at the tree or shrub in question with an eye toward its desired shape. Stare at it from several different perspectives from a distance at various angles, from just a few feet away, and even looking up into its canopy.

Now, rather than doing any pruning, tie some colored ribbon or twine around each limb or branch you think you want to prune. Over the course of several days, each time you walk by the tree or shrub, at different angles and various distances, try to imagine what it will ultimately look like if you were to remove the selected limbs.

Feel free to change your mind. If you're not sure about one of the limbs you've selected, remove the ribbon or move it to another limb. Then re-evaluate your selection. Within a few days, you'll get a better feel for where you should make your pruning cuts and greatly increase your chances of success when you finally make those cuts for real.

Other Tasks to Complete

- Cut back ornamental grasses to about 6 inches tall.
- Cut back perennials almost to ground level.
- Remove dead wood and suckers from trees and shrubs, both evergreen and deciduous.
- Plant dormant trees and shrubs.
- Move dormant plants.
- Dig and divide emerging perennials.
- Scrub clay pots.
- Clean tools.
- Remove leaves from the bottom of ponds or other water features.
