Hearing screenings and video otoscope exams are always free. Not medical exams. Used to determine proper amplification needs only. Hearing aids do not restore natural hearing. Individual experiences vary depending on severity of hearing loss, accuracy of evaluation, proper fit and ability to adapt to amplification. EMBERS CAN REMAIN HOT FOR DAYS.

### DEBRIS PILES

Embers left behind from burning debris piles can remain hot for days, even weeks. Wind can expose smoldering embers hidden in the ashes, allowing them to escape and cause a wildfire. Before leaving, drown the remains with plenty of water, stir, and repeat until cold.

### WOOD HEAT ASHES

Embers from cleaning out ashes in a woodstove, fireplace, wood boiler, or outdoor furnace can remain hot for many days when dumped in the outdoors. Wind can

expose smoldering embers, allowing them to escape and cause a wildfire. Store ashes in a metal container, drown with plenty of water, stir, and repeat until cold. Only dump cold ashes in areas free of flammable material.

### CAMPFIRES

Embers left behind from burning in fire pits or campfire rings can remain hot for several days. Wind can expose smoldering embers hidden in the ashes, allowing them to escape and cause a wildfire. Before leaving, drown the remains with plenty of water, stir, and repeat until cold.
