## There are more than 38 million Americans with hearing loss. Are you one of them?

More people have a hearing loss than any other disability. Hearing loss ranks with arthritis, high blood pressure, and heart disease as one of the four most common health conditions in the United States. Hearing loss could be caused by earwax, ear infection, or it could be simply age related. Untreated hearing loss may lead to poor word understanding caused by auditory deprivation.

Could **middle ear** be the problem?      Could it be **nerve loss**?

## Call TODAY to set up your appointment before May 31st and receive:

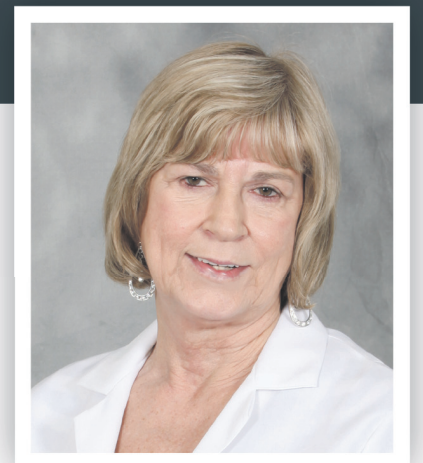

- FREE, no-obligation hearing evaluation and consultation.
- FREE demonstration of the new Audibel® A4™ hearing aids.
- If you currently wear hearing aids, we will clean and check them at no charge.
- Up to \$750 off MSRP toward the purchase of an Audibel A4 hearing aid.
