### Top five myths about hearing loss

- 1) Hearing loss only affects the elderly.**  
Hearing loss can affect anyone, not just the elderly.
- 2) My primary physician will tell me if my hearing is failing.**  
Since your general practitioner is only so well-versed in specific areas of the body, you should have your hearing checked routinely by a hearing health practitioner, just as you have your vision checked or your teeth cleaned.
- 3) I notice a difference in one ear, but the other is fine so I'm ok.**  
If the hearing in one ear starts to fade, your brain will adapt to the changes, at least up to a certain point. Your hearing loss could be well-advanced before you even notice a difference. A regular hearing test can help track your hearing capability.
- 4) Hearing aids will restore my hearing to normal levels.**  
The one thing hearing aids CAN'T do; however, is restore your hearing to "normal." As much as we've learned about how our sense of hearing works, there is no man-made device that can completely replicate human hearing. The good news? Hearing aids can significantly improve your ability to hear well, which leads to enhanced communication with family, friends and co-workers.
- 5) My hearing loss cannot be helped.**  
Many forms of hearing loss can indeed be improved, whether it be by hearing aids, surgery, medication or a simple ear wax removal procedure. You'll never know if you never ask. The first step is to find a hearing healthcare professional you can trust.

### HEAR What Our Customers Say!

*One of the best decisions that I have made in a long time was when I decided to open the door at Long's Hearing Care in Cadillac Michigan. I went in for a hearing test. I was treated with respect from the second that walked in the door. Melissa met me at the front counter and took care of my needs in a very professional manner. I was tested and diagnosed for hearing aids. I was then fitted and when I returned back in 3 days my hearing life was changed. I now don't have to ask people to repeat what they said or have to guess an answer to a question that I really didn't even hear. Today I hear everything loud and clear. Life has completely changed for me. Thank you to Melissa and Mike at Long's Hearing Care!!*

## THINK YOUR FIRE IS OUT? CHECK AGAIN!

## EMBERS CAN REMAIN HOT FOR DAYS.

## BE EMBER AWARE!

**DEBRIS PILES**  
Embers left behind from burning debris piles can remain hot for days, even weeks. Wind can expose smoldering embers hidden in the ashes, allowing them to escape and cause a wildfire. Before leaving, drown the remains with plenty of water, stir, and repeat until cold.

**WOOD HEAT ASHES**  
Embers from cleaning out ashes in a woodstove, fireplace, wood boiler, or outdoor furnace can remain hot for many days when dumped in the outdoors. Wind can expose smoldering embers, allowing them to escape and cause a wildfire. Store ashes in a metal container, drown with plenty of water, stir, and repeat until cold. Only dump cold ashes in areas free of flammable material.

**CAMPFIRES**  
Embers left behind from burning in fire pits or campfire rings can remain hot for several days. Wind can expose smoldering embers hidden in the ashes, allowing them to escape and cause a wildfire. Before leaving, drown the remains with plenty of water, stir, and repeat until cold.
