**PUBLIC SERVICE MESSAGE****HEALTH NOTIFICATION**  
**Are You Hard of Hearing?**

A major name brand hearing aid provider wishes to field test a remarkable new digital hearing instrument in the area. This offer is free of charge and you are under no obligation.

These 100% Digital instruments use the very latest technology to comfortably and almost invisibly help you hear up to 25% BETTER THAN NORMAL HEARING! This amazing technology - GENIUS™. New GENIUS™ technology provides you up to 25% BETTER SPEECH RECOGNITION in challenging listening environments than people with normal hearing.\* With the amazing directional focus feature, you are able to zoom in on a conversation, even with people who are on the side or behind you!

If you wish to participate, you will be required to have your hearing screened in our office FREE OF CHARGE to determine candidacy and review your results with the hearing instruments with our hearing aid specialist.

At the end of this evaluation, you may purchase this same model instrument, if you so desire, at a TREMENDOUS SAVING for participating in this test. Special testing will be done to determine the increased benefits of this technology.

Benefits of hearing aids vary by type and degree of hearing loss, noise environment, accuracy of hearing test, and proper fit. This is a wonderful opportunity to determine if hearing help is available for your hearing loss and get hearing help at a very affordable price.

We have set aside 30 spots for FREE testing next week. Do not delay; again, there is no cost or obligation to participate. Local testing will take place at the location listed below.

\*Hearing screening is always free. Not a medical exam. Audiometric test to determine proper amplification needs only. \*\*Hearing aids do not restore natural hearing ability. Individual experiences vary depending on severity of hearing loss, accuracy of evaluation, proper fit and ability to adapt to amplification. ^See yourr Miracle Ear representative for complete details. Field test is an in-fifice demonstration. Not valid with any other offer or discount. See your Miracle-Ear representative for complete details on all offers presented in this advertisement. Studies conducted at the University of Northern Colorado (2014) and Oldenburg Horzentrum (2013) showed that Speech Reception Thresholds (SRT) in cocktail-party situations improved up to 2.9 dB for wearers with mild to moderate hearing loss using GENIUS with Directional Focus, compared to people with normal hearing. This corresponds to over 25% improvement in speech understanding.
